Nova Southeastern University

Nova Southeastern University is a not-for-profit, fully accredited, coeducational University classified by Carnegie as both a “high research” and “community engaged” University. It was founded in 1964 as Nova University. NSU’s main campus is located on the 314-acre main campus in Ft. Lauderdale-Davie. It has a presence throughout Florida, the U.S. and in nine countries. Its 18 Colleges of study offer undergraduate, graduate, and professional programs in the fields of medicine, psychology, pharmacy, arts and sciences, dental medicine, education, law, optometry, computer and information sciences, humanities and social sciences, human services and justice, nursing, business, and oceanography. It also has programs offered for children and families through the Mailman Segal College for Human Development and the University School. NSU also brings cultural enrichment to the community through the Museum of Art, the Miniaci Performing Arts Center, public access to the Alvin Sherman Library, Research and Information Technology College, and programs in the performing and visual arts.

From the beginning, the University has distinguished itself by its innovative outlook, its unique programs that provide both traditional and nontraditional choices in educational programs, and its research in many fields aimed at solving problems of immediate concern to the community. The University’s Colleges and programs share a common mission to educate students for leadership roles in a variety of professions. Through the Nova Southeastern University plan, students master competencies at each academic level, develop a sense of professional ethics and responsibility, and learn to appreciate the role of the professional as a key individual in society.

NSU stresses the critical relationship between theory and practice; it reinforces and tests the classroom experience through applied research and community service as integral parts of academic experience. Consistent with its mission, the University extends its resources to provide educational opportunities to working professionals nationwide, with faculty teaching on the main campus, online, at regional campuses throughout Florida and Puerto Rico, and across the country. NSU also delivers programs through a variety of educational technologies, including telecommunications. Nova Southeastern University is committed to the idea that education should not be time-bound or place-bound. Through its educational offerings, research projects, and programs of public service, the University encourages the free exchange of ideas and the search for knowledge that is the cornerstone of the academic tradition.

Nova Southeastern University programs are approved for educational benefits by the Bureau of State Approval for Veterans Training, Florida Department of Veterans Affairs. The University is authorized under federal law to enroll nonimmigrant alien students.

Nova Southeastern University’s general policies on student relations are on file in the Office of the University Registrar.

NSU Mission Statement

The mission of Nova Southeastern University, a private, not-for-profit institution, is to offer a diverse array of innovative academic programs that complement on-campus educational opportunities and resources with accessible, distance-learning programs to foster academic excellence, intellectual inquiry, leadership, research, and commitment to community through engagement of students and faculty members in a dynamic, lifelong learning environment.

NSU Vision 2020 Statement:

By 2020, through excellence and innovations in teaching, research, service, and learning, Nova Southeastern University will be recognized by accrediting agencies, the academic community, and the general public as a premier, private, not-for-profit university of quality and distinction that engages all students and produces alumni who serve with integrity in their lives, fields of study, and resulting careers.

NSU Core Values:

Academic Excellence
Student Centered
Integrity
Innovation
Opportunity
Scholarship/Research
Diversity
Community

President's Message

Welcome to Nova Southeastern University!

NSU's main campus is located in Greater Fort Lauderdale with locations around Florida, the Bahamas and Puerto Rico. We are at the heart of the region's academic and research hub, and just minutes from some of the world's best beaches. With more than 26,000 students and 152,000 alumni around the world, you will find Shark Friends in every corner of the country – and beyond. Nova Southeastern University is the largest independent, not-for-profit university in the Southeast, and the seventh largest in the United States. As president of NSU, I invite you to become an ambassador of this extraordinary educational institution that is in its sixth decade of existence.

NSU's undergraduate programs are diverse and all serve as a conduit into more than 100 graduate and professional programs. NSU boasts a strong health professions division and our dual-admit program for undergraduate students is great for those with who wish to pre-apply to our nationally ranked graduate and professional programs. Our business school is the largest in Florida and caters to future business leaders and entrepreneurs who seek a personalized real-world education. Alumni from our school of education are teachers and administrators across the county, including more than 300 sitting superintendents and 38 college presidents hold our Ed.D. degree. NSU's programs in psychology, conflict resolution and family therapy are nationally renowned. So, whether you are preparing to study law, computer sciences or marine biology – NSU is the best choice to pursue higher education.

We are proud to be classified as one of only 37 universities, out of more than 4,000, that have the dual designation of both “high research” and “community engaged.” This did not happen by accident. Our faculty and student researchers are changing the world in areas such as coral reef preservation, cancer drug therapies, autism, neuro-immune medicine, and many others. And our students, faculty and staff give back to the community each year through approximately 2,000 different community events. NSU is committed to providing the highest quality faculty in small classroom environments where interaction is a key ingredient in the learning process.

I invite you to take a few minutes and look around our website and discover NSU. Get to know our faculty, our students and programs – I am sure you will like what you see. Our virtual campus map will give you building-by-building access to our classrooms, athletics facilities, student union, and libraries. And, if you are in town, please stop by to say hello and join us for a tour of our beautiful 300-acre campus.

Sincerely,

A handwritten signature in blue ink that reads "George Hanbury". The signature is written in a cursive style and is set against a light blue rectangular background.

George L. Hanbury II, Ph.D.
President and CEO
Nova Southeastern University

Dean's Message

I am pleased to extend you a warm welcome to Nova Southeastern University and the College of Psychology. We hope to guide you through a rich and transformative journey where you will grow personally, academically and socially on the road to becoming major contributors to our society. Our aim is to guide you in your development of skills needed to impact the quality of life of individuals, families, institutions, and communities.

Our College offers bachelor's degree programs in psychology and behavioral neuroscience, as well as graduate programs in clinical and school psychology, counseling, experimental psychology, forensic psychology, and general psychology, along with other specialized training experiences. Our outstanding faculty guide students, not only in discovering and appreciating the factual content of their respective fields of study, but also in developing the critical and creative thinking skills essential to producers or consumers of science and the investigative skills of aspiring professionals, researchers, and clinicians.

The scope of psychology, counseling, neuroscience and related fields is expansive, as our disciplines describe and explain the effects of psychological processes from the level of individual brain cells to the scale of complex social interactions. The areas of expertise our faculty collectively possess are similarly diverse. Regardless of the specific field or subfield of study, however, our students benefit from the greater involvement that small classes provide and from the related opportunities for research collaborations and for experiential placements in community settings.

While the lasting memories of one's years at a university surely include many events beyond the confines of the classroom, one's day-to-day enjoyment while enrolled as a university student depends largely on his or her chosen field of study and engagement with its particular subject matter. The College of Psychology is proud to house engaging undergraduate majors, an array of highly regarded graduate programs and related training opportunities and a clinic that serves our community. We hope that these opportunities at our university will figure positively in the memories our students of their university experience.

Conducting basic and applied research and providing quality assessment and treatment of psychological problems is one of the greatest challenges facing modern society. The College seeks to address these challenges by providing a broad range of training, by conducting research that addresses society's pressing problems, and by offering services to the community through its clinics.

On behalf of the faculty and staff of the College of Psychology, I am pleased to welcome you to Nova Southeastern University. It is my sincere belief and hope that you will find your time here richly rewarding, both during your enrollment with us and, retrospectively, as alumni entering the workforce or continuing to pursue your educational goals.

Karen S. Grosby, Ed. D.
Dean, College of Psychology

HISTORY

Nova Southeastern University's (NSU's) Psychology Postdoctoral Residency Program (PPRP) was established in the fall of 2004. Since its inception, psychology residents have been involved in a number of programs, including the College of Dental Medicine, College of Osteopathic Medicine, the Mailman Segal Center for Human Development, the College of Psychology, and the University School. Nova Southeastern University's Psychology Postdoctoral Residency Program is comprehensive in its scope and aims to cultivate residents' knowledge, skills and overall professional identity as psychologists. Working closely with seasoned professionals who are recognized experts in their field, residents are encouraged to continue to take on an inquisitive mindset and practice lifelong learning.

The Nova Southeastern University's Postdoctoral Residency Program is a member of the American Association of Psychology Postdoctoral and Internship Centers (APPIC).

Association of Psychology Postdoctoral and Internship Centers

10 G. Street, N.E., Suite 750

Washington, DC 20002

www.appic.org

TRAINING MISSION

The Psychology Postdoctoral Residency Program at Nova Southeastern University fully supports the mission of the University by providing a quality Health Service Provider training program for psychology residents that promotes their development as professional psychologists. Engaging in sound science and practice, this goal-directed program aims to cultivate advanced competencies through well-integrated training modalities and interdisciplinary training activities. Residents will strengthen their understanding and skill in integrating high legal and ethical standards, models and policies. They will deepen their appreciation of individual, racial, and cultural diversity and establish routine self-reflective practice. The program will foster a learning environment rich in scholarly inquiry, professional values and leadership, inter-professional collaboration, provision and use of sound supervisory and teaching strategies, and community service.

MODEL OF TRAINING

Our philosophy is that sound clinical practice in psychology is based on scientific research, empirically supported methods for prevention, assessment, consultation, intervention and creative individuation. Our training program embraces a Scientist-Practitioner Model of Training in which research and scholarly activities guide and direct clinical practice, and clinical practice leads to scientific inquiry and systematic application of research results.

HEALTH SERVICE PSYCHOLOGY: PROFESSION-WIDE COMPETENCIES

- **Level One Competencies: Advanced Competency Areas:**
 1. Integration of science and practice
 2. Ethical and legal standards and policy
 3. Individual and cultural diversity

- **Level Two Competencies: Program Specific Competencies:**
 4. Psychological intervention

5. Psychological assessment
6. Supervision
7. Teaching
8. Consultation
9. Relational
10. Reflective practice, self-assessment and self-care

TRACKS

The tracks are designed to cultivate residents' knowledge and skills in health service psychology, with focus on their specific area of interest. Residents will participate in one year of intensive training under the supervision of qualified licensed psychologist(s).

- I: Behavioral Psychology and Developmental Assessment Training Program
- II: Suicidal and Violence Prevention & School-Related Psychological Assessment and Clinical Intervention
- III: University School & School-Related Psychological Assessment and Clinical Intervention
- IV: General Psychology

Track I: Behavioral Psychology and Developmental Assessment Training Program

- The overall focus of this track is to advance knowledge and skills in providing assessment and treatment services for children and their families. This track offers high level training in developmental assessment, applied behavior analysis (ABA), autism spectrum disorder, developmental disabilities, and parent training. Training occurs through a number of outpatient clinics. There are two distinct postdoctoral residency positions at the Mailman Segal Center for Human Development:
 - Developmental Assessment Clinic
 - Diagnostic Services: This placement offers specialized training in assessment of children suspected of having an autism spectrum disorder or other related developmental disorder. Resident are trained in gold-standard assessments and have the opportunity to interface with a large volume of clients.
 - Autism Education Program: Following diagnosis, the resident will conduct one-on-one sessions providing psychoeducational therapy with newly diagnosed families. These sessions are comprised of evidence-based support to ensure that families receive the most up-to-date information about ASD and community resources.
 - Starting Right: Residents will participate in Starting Right, which is an early intervention, parent-child class serving children ages 18-36 months exhibiting delays in language and social skills. With an emphasis in caregiver training, the ABA-based program teaches caregivers how best to support their child's development.
 - Behavioral Assessment and Intervention
 - Feeding Disorders Clinic:
 - For children who refuse to eat an adequate volume of food or for those who limit the variety of food they willingly accept, the Feeding Disorders Clinic works with an inter-professional team to support healthy eating habits and transform mealtimes into successful experiences. Residents will learn to

- conduct feeding evaluations as well as implement treatment for feeding disorders as a part of a treatment team.
- Challenging Behavior Clinic:
 - The Challenging Behavior Clinic addresses behavioral difficulties through direct support for caregivers via parent training sessions or individual ABA sessions during which the therapist initially works directly with the child prior to integrating caregivers. Both of these treatments teach the child adaptive methods to replace problem behaviors with more functional skills. Residents conduct behavioral assessment and intervention for children and their families.

Track II: Suicidal and Violence Prevention & School-Related Psychological Assessment and Clinical Intervention

- The overall focus of this track is to advance knowledge and skills in clinical research and presentation to provide direct clinical assessment, prevention, intervention, and consultation services.
- The populations with which the resident will predominately work are pre-school and school-age students and their families, university staff and students, and the community.
- Specific activities that will be provided in this track are two-fold and include half time in the College of Psychology (CoP) School-related Psychological Assessment and Clinical Intervention (SPACI) clinic and half time training with the NSU Office of Suicide and Violence Prevention. Suicide and Violence Prevention residents will collaborate with the Co-Directors of the Office, participating in projects that involve the development of training materials for prevention of suicide and violence and delivering training to university groups of staff and students, as well as to groups in the community. In addition, residents will be prepared to intervene, as well as to provide post-intervention services in the aftermath of tragedies as needed. Residents will coordinate the writing, editing, and digital posting of a quarterly newsletter, collaborating with the SVP doctoral intern, as well as search for research grants and participate in the writing of grant proposals. The activities in the CoP SPACI clinic include providing comprehensive psychological evaluations and psychotherapy; helping to coordinate assessments, interventions, and training experiences; helping to plan and to conduct research; and assisting with the supervision of clinical psychology and school psychology graduate students and interns. Clinical supervision of junior members under the supervision of a licensed psychologist and supervised teaching are also required.

Track III: University School & School-Related Psychological Assessment and Clinical Intervention

- The overall focus of this track is to advanced knowledge and skills in direct clinical assessment, intervention, and consultation services, primarily for school-age populations, including pre-schoolers and college students.
- The populations with which the resident will predominately work are school-age students, school staff, and parents.
- The specific activities that will be provided on this track are two-fold and include direct service at the University School on campus with grades pre-k to 12 and service in the College of

Psychology (CoP) School-related Psychological Assessment and Clinical Intervention clinic, providing comprehensive psychological evaluations and psychotherapy; helping to coordinate assessments, interventions, and training experiences; helping to plan and to conduct research; and assisting with the supervision of clinical psychology and school psychology graduate students and interns. Clinical supervision of junior members under the supervision of a licensed psychologist as well as supervised teaching are also required.

Track IV: General Psychology

- The overall focus of this rotation is to advanced knowledge and clinical skills in providing direct clinical services for the Psychology Service Center and to expand skills in research, teaching, clinical supervision, and program review.
- The population the resident will predominately work with is adults. Opportunities for specialization with particular populations of interest are available.
- The specific activities that will be provided on this rotation include psychological assessment, treatment and consultative services. Residents may work with faculty on research related activities, including literature searches, reading and summarizing the literature and making recommendations for specific studies based on gaps uncovered in the literature, critical analysis of the specific research field, preparing data for analysis, and assisting in preparing application to secure funding for research projects. Opportunities to work with the Dean's office to become familiar with the preparation for program approval or accreditation reviews are available. Residents will have the opportunity to supervise psychology practicum students and interns at the Psychology Service Center and to teach master's and doctoral level courses at CoP.

SUPERVISION

All Residents are required to receive at least three (3) hours of clinical supervision per week by appropriately credentialed psychologists, with at least two (2) hour of such as individual face to face supervision and one (1) hour of group supervision per week (which will include supervision of supervision of a junior member(s) of the profession). Residents will engage in one (1) hour of case conference weekly. Direct observation/video recording is a required part of each evaluation process.

Developing individualized training plans (Appendix A), faculty supervisors will explore and guide residents in selecting training opportunities that reflect residents' professional interest and individual career objectives. Faculty supervisors and residents will develop a mutually agreed upon plan which is based on a logical training sequence that includes core training activities that build fundamental competencies as well as individualized areas of interest. With this systematic approach, the NSU's PPRP will provide a comprehensive clinical training experience that will prepare residents for the independent practice of psychology once he or she becomes licensed.

OTHER LEARNING ACTIVITIES

Mentorship

University faculty supervisors/mentors will work closely with residents to establish and solidify a strong professional identity as a psychologist. Residents have the opportunity to consolidate their professional identity by gaining experience in different roles as a psychologist and to effectively function in those professional roles across setting and situations. Residents may co-teach graduate and/or undergraduate psychology courses with their faculty mentors, learn how to pursue grants and contracts, collaborate with organizations and/or community entities, engage in program review, work with higher administration in

activities associated with program certification, licensure, new program development, as well as exposure to the day-to-day operations in an academic support unit. Issues of recruiting and hiring staff, organization and management of project(s), and budgets related to one's institution are additional areas that residents may gain experience.

Psychology Resident Seminars

In this regularly scheduled seminar, psychology residents meet with the psychology faculty to discuss issues of clinical professional development specific to their advanced level of training. Topics covered include diversity issues, psychological ethics/law, evidence based clinical supervision, licensure and board certification, research management/grants, and professional networking/employment.

Supervision of Supervision

Residents meet with psychology interns for supervision, under the supervision of a licensed psychologist(s), on a bi-weekly basis. Residents will be required to formally present an audio recording of their supervision for review. The purpose of this hierarchical supervision model is to assist in the development of intermediate to advanced skills and knowledge in the area of clinical supervision.

Psychology Faculty Supervisor Meetings

In this bi-monthly meeting, the chief psychologist presents information of general interest with faculty, conducts in-service trainings, engages the faculty in regular review of the training program with the focus on quality improvement, and discusses administrative and clinical issues.

Training Resources

The residents will meet with the training director, who also serves as primary supervisor, on a weekly basis. Faculty supervisors and administrators are routinely available to residents. Residents are considered staff members of the university and will be assigned offices, computers, access to NSU's library, as well as access to the CoP Testing Library. Employee services, career development, and technological resources are readily accessible to residents. Each resident will also be provided with an allotted funding to participate in professional development activities of their choice.

Diversity

The PPRP takes action to demonstrate sensitivity to the issues of cultural and individual diversity, a key component of the training of psychologist. Not only is the cultural diversity stressed during the context of individual and group supervision, but the issues are frequently reviewed and discussed in special topic seminar and case conferences. The cultural and racial diversity of the south Florida area provides residents with many opportunities to provide services to diverse clients and discuss diversity issues in supervision.

EVALUATIONS

Evaluation of the Residency Program

Residents formally evaluate their training experiences and supervisors annually. Standard rating forms are provided for this purpose. Informal evaluation of the residency is a continual process in which residents are encouraged to discuss issues, concerns, and suggestions throughout the year with their supervisors, the training director and chief psychologist. Exit interviews are also conducted by the training director and chief psychologist to gain ongoing feedback regarding the resident's training experience. Information from this routine evaluation is utilized to ensure program quality and improvement. Prospective residents are

welcome to review these evaluation forms during their interview visit. See Appendix C for a copy of the Evaluation of the NSU’s PPRP form.

Evaluation of the Resident

Residents receive three formal, written evaluations throughout the residency year. These evaluations are based on learning outcomes established by the program to measure the resident’s level of achievement and competencies. Upon completion, copies of the resident's and the supervisor's evaluations are kept in the resident's training file. See Appendix B for a copy of the Competency Evaluation Form.

GENERAL INFORMATION

Stipend and benefits The annual stipend for the one year NSU Residency is set at \$29,887.89. All postdoctoral resident positions include health insurance. Residents receive 3 weeks of annual leave up front, to be used within the 12 months of the position; 11 days of sick leave which is earned (2 during the 1st 3 months and 1 for each additional month); 2 personal days and all official NSU holidays. See <http://www.nova.edu/cwis/hrd/holidays.html> for list of official days. Residents are allowed time off to attend approved educational conferences or job interviews. Additionally, resources are available for conferences.

Time Requirements

The residency year begins on September 1st and ends August 31st. Residents are expected to successfully complete one year of full time supervised training and accrue **2000 total clinical hours, with a minimum of 900 hours being direct client contact**. Residents will document their training activities utilizing the PPRP’s log of contact form.

Resident Weekly Clinical Hours and Activities

Training (15%)	
Clinical Seminar	2
Professional Development	3
University-wide Training/Program Meetings	1
Supervision (10%)	
Individual Supervision	2
Group Supervision	1
Case Conference	1
Direct Clinical Services (60%)	
Clinical Services	22
Consultation/Advocacy/Outreach	2
Research/Literature Review (5%)	2
Teaching and Supervision of Others (8%)	3
Administrative Tasks (2%)	1
TOTAL HOURS	40

Residency Administration

The training director/primary supervisor works in collaboration with each track supervisor to ensure that residents experience a well-integrated and meaningful training experience. Clinical supervisors within each track work closely with their residents throughout the training year, coordinating the assignment of training activities which are aligned to residents' Individualized Training Plans, providing weekly individual supervision, and evaluating the residents. The final administrative responsibility for the residency program rests with the chief psychologist who provides oversight of the program.

Florida Licensure

Satisfactory completion of the Nova Southeastern University Psychology Postdoctoral Residency Program fulfills the licensure requirements for postdoctoral supervised practice in the state of Florida. Psychology candidates considering licensure in another state(s) may want to study the licensure requirements of the state(s) of interest and plan accordingly.

RIGHTS AND RESPONSIBILITIES

Due Process

Probation, Suspension or Dismissal

The resident will be placed on probation if he or she receives a rating that requires formal remediation on any one criteria of the evaluation form utilized by the NSU Psychology Postdoctoral Residency Program. Moreover, residents who receive a rating which requires formal remediation on issues regarding ethical and/or professional conduct that is determined to interfere with their ability to provide clinical services in a competent manner will not be allowed to continue to provide services to clients and will be placed on immediate suspension. Specifically, the resident will receive a probation notice from the director of training detailing the areas needing remediation and the specific plan of action to address improvement(s). The resident will be referred to the appropriate resources as a condition of continuing the training program. In the event of an unsuccessful remediation, the resident will be referred to a committee designated by the chief psychologist for review. The committee reserves the right to dismiss residents. Residents will not be certified as having completed their residency training program if they are dismissed from the program or are suspended from the program for more than the allotted leave time available. A letter from the director of training will be mailed to the resident with conditions for completing the program, if applicable.

Grievance Procedure

The Postdoctoral Psychology Residency Program values professionalism, honesty, and ethical conduct in the handling of resident concerns. At all times, matters are handled in the spirit of education and development. The purpose of the grievance and appeals process is to allow for the orderly resolution of resident grievances concerning a policy, procedure, or administrative action. At all times, the respect and protection of residents is of utmost concern.

Evaluation of competency resides within the expertise of the clinical supervisors who are uniquely qualified by their training experience. Such evaluations are not subject to grievances and appeals under this section, unless there is an allegation of federally/state protected discrimination

Informal Procedure

After receiving an evaluation which a resident wishes to challenge, the resident should schedule an appointment with the track supervisor, stating the reason for the appointment. The appointment with the track supervisor must be set within five working days following the evaluation. In extenuating circumstances, where it would be difficult or impossible for the resident or the supervisor to schedule the appointment within the designated time limit, the appointment should be scheduled as soon thereafter as possible, but in no case exceeding ten days from the date of the evaluation.

Should the issue fail to be resolved to the resident's satisfaction in the meeting with the track supervisor, the resident may request that a conference be scheduled with the director of training. The conference with the director of training should be held within three working days of the resident/supervisor conference. The resident's conference with the director of training will be held at such a time that the supervisor in question will be able to participate in the conference. The director of training shall render an opinion regarding the resident's challenge of the evaluation within three working days of the conference with the resident and the supervisor.

Up to this point, the grievance procedure is informal, with all information being exchanged orally. This guideline is intended to facilitate open communication between the supervisor and the resident. It is hoped that the majority of resident grievances will be resolved at the informal level, with the inclusion of only the essential parties involved and the preservation of confidentiality, as no formal documentation will have been generated.

Formal Procedure

Should the director of training rule in favor of the supervisor, the resident has the right to appeal to the Ad Hoc Grievance and Appeals Committee (the Grievance Committee). Since the committee will be formed only in the event a formal grievance is filed, the appeal will be submitted to the director of training.

This appeal represents the initial step in the Formal Grievance Procedure. The appeal of the grievance must be submitted in writing by the resident, stating clearly and concisely the circumstances and particulars relating to the evaluation which initiated the grievance. The resident's written appeal must be submitted within five working days following the conference with the director of training. Failure to submit the appeal within the designated time will invalidate the resident's right to challenge the evaluation in question, which will then stand as assigned.

The Grievance Committee will be made up of two Psychology Postdoctoral Residency Program training supervisors (one whom is appointed Chair), selected, as soon as possible, by the director of training. None of the supervisors will have had direct supervisory authority over the resident in question. An outside member of the training team will also be appointed to the committee, with approval from the resident.

The composition of the Grievance Committee shall be as follows: the Chairperson of the Committee will serve without a vote. The three voting members will be the two supervisors and the member identified as an outside member.

When all members have been identified, within three working days of the resident's written appeal, the resident and supervisor will be notified in writing of the implementation of the formal grievance

procedure and informed of the members identified to serve on the Grievance Committee. Should the resident involved in the grievance question the composition of the Grievance Committee, he or she may request a replacement of the two members not previously assented to by the resident.

At a time not to exceed five working days from the date of receipt of the resident's written appeal by the Chairperson of the Grievance Committee, a hearing date will be scheduled at a time when all parties involved will be available. The hearing should be held at the earliest possible date to insure efficient treatment of the grievance.

The Chairperson of the Grievance Committee has the responsibility to gather all pertinent data related to the grievance. The supervisor also has the right to provide the committee with a written statement regarding his or her justification for the evaluation in question. All documentation pertaining to the grievance procedure will remain confidential and be provided only to the resident, the director of training, the supervisor involved, and each member of the Grievance Committee. Such documentation should be distributed at least twenty-four hours prior to the scheduled hearing.

During the hearing, it shall be the Chairperson's responsibility to insure that the discussion and questions remain germane to the issue. The Committee members, having reviewed the pertinent documentation presented by both the resident and the supervisor, shall have the right to question both the resident and the supervisor.

The number of people present during the hearing is limited to committee members, the resident, the supervisor, and a recording secretary. Witnesses may be called into the room as needed. Deliberation of the three voting committee members will commence at the close of the exchange of information when all parties have been dismissed from the hearing. A vote of two-thirds of the total voting membership of the committee is required to finalize its conclusion.

The written conclusion of the Grievance Committee regarding the resident's probation, suspension, dismissal or clearance of all charges, shall be presented within one working day to both the resident and the supervisor, who shall accept or reject it in writing to the Chairperson of the Committee within three working day of receiving it.

If the conclusion of the committee is rejected by either party, it may be appealed by either to the chief psychologist of the Nova Southeastern University Psychology Postdoctoral Residency program. An appeal to the chief psychologist must be made in writing not to exceed three working days after rejecting the decision of the Grievance Committee and should clarify in detail why the decision should be overturned. It must include a copy of the written appeal submitted to the Grievance Committee, the written conclusion of the Committee, and any additional pertinent comments related to the Committee's decision.

The chief psychologist has the right to question any party involved, as he or she deems necessary, including any member of the Grievance Committee, before reaching a final decision on the matter. The chief psychologist should render his or her written decision within three working days of receiving the appeal. The decision of the chief psychologist shall be final.

The time limits stated in the above procedure serve to facilitate execution of the grievance process as quickly and efficiently as possible.

Nondiscrimination

NSU admits students of any race, color, religion or creed, sex, pregnancy status, national or ethnic origin, non-disqualifying disability, age, ancestry, marital status, sexual orientation, unfavorable discharge from the military, status as a disabled veteran, or political beliefs to all the rights, privileges, programs, and activities generally accorded or made available to students at NSU, and does not discriminate in the administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other school-administered programs.

Nova Southeastern University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097: Telephone number 404-679-4501) to award bachelors, masters educational specialist, and doctoral degrees. The University is chartered by the State of Florida.

Administration Assistance

Ongoing resources including technology, library support, career development, and other similar services are accessible to residents. The types of clerical resources available will depend on the training setting.

APPLICATION AND SELECTION

Internship and Academic Preparation Requirements

The goal of the PPRP is to select residents that will be the best match for the program. Candidates selected into the program have demonstrated strong clinical knowledge and exhibited global traits that included motivation, dedication to the field and training, and perseverance. It is preferred that applicants have successfully completed an APA-approved graduate program and internship in clinical, counseling or school psychology prior to beginning their postdoctoral training with this PPRP.

Selection

Applications for the NSU's PPRP positions are due by **December 31st**. Completed applications are reviewed and ranked by the training director and the PPRP review subcommittee. Acceptable candidates are invited to interview with members of the PPRP review subcommittee in person or by video conference. The review committee evaluates the quality of applicant's academic preparation, clinical experience, letters of recommendations, degree of "fit" to the residency program and interview. The evaluation is used to produce a rank ordered list of candidates that are the best match. The PPRP subcommittee reaches a consensus regarding the final rank ordered list of candidates which is then forwarded to the director of training and chief psychologist for review and final decision regarding position appointments. The residency program participates in the APPIC Match process. Please refer to APPIC Match at <https://www.appic.org/Match/About-The-APPIC-Match> for detailed information.

Start Dates

The NSU's Psychology Post-Doctoral Residency Program begins on September 1st. It is the program's policy that residents must have successfully defended their dissertation and have their degree conferred before they may begin the program. Residents with extraordinary circumstances may petition for two 30-day extensions. If granted, the start date is delayed and the resident may be required to extend his/her period of training for 30-60 days (possibly without compensation). Residents who are unable to begin their residency training more than 60 days after the program's start date may be terminated from the program. In this unusual circumstance, alternative candidates are contacted and the open position is filled as quickly as possible.

Unforeseen Circumstance Including Leave of Absence

Resident who must interrupt their training for an adequate reason such as illness may be granted a leave of absence. Residents should provide a written request to the director of training at least thirty (30) days before anticipated start of leave or as soon as possible under unforeseen circumstances. If granted, the leave shall be for a stated period of time, not to exceed one year. The resident will return and complete the remaining 12 month contract.

During unpaid leave, the resident may continue health and other insurance participation but must make arrangements to directly pay his/her share of the contributions

Interviews

Applicants invited for an interview will have the opportunity to meet with the program's faculty, administration and residents. While on-site interviews are not required, they are strongly encouraged. Video conferencing may serve as an alternative option for those candidates who are not able to attend an in-person interview. Interviews are scheduled in February; The program will provide an invitation for interview a minimum of two weeks prior to interview day.

PROGRAM FACULTY

- **Peter Caproni, Ph.D.**, Institute for Advanced Psychological Studies, Adelphi University (1989); Florida Licensed Psychologist, Florida Certified School Psychologist, NSU'S College of Psychology assistant professor, NSU/University School consulting psychologist. Interests include collaborative/therapeutic assessment; legislative advocacy; psychological services within schools; psychotherapy research, emotional/behavioral issues with young people in transition.
- **Ralph E. (Gene) Cash, Ph.D., ABPP, NCSP**, New York University, professor. Florida licensed psychologist. Director, School-related Psychological Assessment and Clinical Intervention clinic. School psychology; psychological assessment, diagnosis, and treatment; depression; anxiety disorders; suicide prevention; forensics, including child custody, wrongful death effects, and disabilities; stress management; and psychology and public policy.
- **Douglas Flemons, Ph.D., LMFT**, Nova Southeastern University (1989), professor of family therapy (College of Arts, Humanities, and Social Sciences); co-director of the NSU Office of Suicide and Violence Prevention. Florida licensed marriage and family therapist. Suicide assessment, suicide prevention and postvention, hypnotherapy, couple therapy, brief therapy, sex therapy, systemic theory, academic writing.
- **Karen Grosby, Ed.D.**, Nova Southeastern University, Dean of the College of Psychology.
- **Donna Hillier, Psy.D.**, Nova Southeastern University, assistant professor. Director of training for the NSU Psychology Post-Doctoral Residency Program and director of academics at the Mailman Segal Center for Human Development. Clinical training, supervision and professional development; psychotherapy case conceptualization; stress management; eating disorders.
- **Kristen M. Jones, Psy.D.**, Nova Southeastern University, assistant clinical professor; assistant director, School-related Psychological Assessment and Clinical Intervention clinic. Licensed psychologist; clinical psychology; psychological assessment and intervention planning, implementation, and monitoring; preschool and school mental health; assessment of autism spectrum disorders; parent-mediated interventions; and developmental-behavioral pediatrics.
- **Roseanne Lesack, Ph.D., BCBA-D, ABPP**, director of the Unicorn Children's Foundation Clinics at the Mailman Segal Center for Human Development. Behavioral intervention for children with a specialization in pediatric feeding disorders. Works extensively with parents to ensure treatment generalization. Board certified behavior analyst at the doctoral level and is boarded in Clinical Child and Adolescent Psychology.
- **Barry Nierenberg, Ph.D., ABPP**, University of Tennessee, associate professor. Rehabilitation and Health Psychology: psychological factors in chronic illness, biopsychosocial aspects of wellness and disease, healthcare disparities, pediatric psychology, child and family adaptations to acute and chronic medical conditions. The business of psychology and professional credentialing.
- **Scott Poland, Ed.D.**, Ball State University, associate professor. Professional experience has included leading national crisis teams and primary interests are suicide intervention, crisis intervention, youth violence, self-injury, school safety and delivery of psychological and counseling services in schools.

- **Timothy S. Razza, Psy.D.**, Nova Southeastern University, assistant professor. Chief psychologist for the NSU's Psychology Post-Doctoral Residency Program. Evidence-based treatment of anxiety and disruptive behavior disorders in children and adolescents; assessment of suicide in children and adolescents; psychological assessment; clinical training.
- **Timothy Scala, Psy.D., C.F.C.** Nova Southeastern University, assistant professor and program director of the Bachelor of Science Degree in Recreational Therapy in Nova Southeastern University's department of Justice and Human Services. Licensed Clinical Psychologist/Clinical Supervisor at the School-related Psychological Assessments and Clinical Interventions (SPACI) clinic. Professional/Clinical interests include psychological and psychoeducational assessment, working with the child and adolescent population, behavior modification, anxiety/depression, stress management, and family counseling. Has conducted research in the areas of adolescent issues, parent training, and working with United States Veterans. Member of APA and the American College of Forensic Examiners, in which he is a Certified Forensic Consultant.
- **Leonard Schnur, Psy.D., ABPP**, Nova Southeastern University, associate clinical professor. Clinical supervision and training; interests include treatment of mood disorders for adult and adolescent populations, time-limited dynamic psychotherapy, and psychotherapy integration approaches for treatment of personality disorders.
- **Alessandra Shapiro, Psy.D.**, licensed psychologist and supervisor of the Developmental Assessment Clinic at the Unicorn Children's Foundation Clinic within Mailman Segal Center for Human Development. Specializes in the assessment of autism and developmental disabilities. She also facilitates a program geared toward providing families with education and support for navigating the next steps after diagnosis.

Appendix A

**Nova Southeastern University
College of Psychology, Psychology Postdoctoral Residency Program
Individualized Training Plan**

Resident:	Date:
Track:	Residency Year:
Clinical Supervisor(s):	

With support of your clinical supervisor(s) please list detailed activities that you plan on engaging in during the training year. These training activities are aimed to promote the development of advanced competencies. This intentional training model will provide you with the opportunity to engage in a carefully planned training experience, and it will allow you to demonstrate competency at time of evaluation.

Level One Competencies: Advanced Competency Areas

I. Integration of Science and Practice

II. Ethical Legal Standards and Policy

III. Individual and Cultural Diversity

Level Two Competencies: Program Specific Competencies

IV. Psychological Intervention

V. Psychological Assessment

VI. Supervision

VII. Research/Evaluation

VIII. Teaching

IX. Consultation

X. Interdisciplinary Systems

IX. Relational

XII. Reflective Practice, Self-Assessment, Self-Care

Additional Comments:

Sample:

II. Ethical Legal Standards and Policy

1.	Attend "Ethical Decision-Making and the APA Ethics Code" workshop at the APA conventions
2.	Attend NSU's workshop on Ethics
3.	Study and Pass Florida State Laws and Rules exam

Appendix B

Nova Southeastern University College of Psychology, Psychology Postdoctoral Residency Program Competency Evaluation Form

Resident:	Date:
Track:	Residency Year:
Clinical Supervisor:	

Evaluation: (highlight/circle one): First Second Final

This evaluation is based on the following sources of information (mark/highlight all that apply)

Direct observation/video recording	Discussion in supervision	Audio recording
Feedback from others	Participation in meetings	Review of clinical records
Other:		

*Direct observation/video recording is a required part of each evaluation process

Ratings:

4 - Advanced knowledge, skills, and competencies: Independent level of knowledge and performance; Advanced degree of competence with consultation. Ready for autonomous practice.

3 - Intermediate knowledge, skills, and competencies: Proficient level of knowledge and performance; Advanced degree of competence with routine supervision

2 - Basic knowledge, skills, and competencies/ Needs remedial education and training: Competent level of knowledge and performance; Effective performance with routine supervision. Requires remedial education/training, which is integrated into the resident’s Individual Training Plan, in order to achieve the PPRP’s expected level of competency.

1 - Minimal knowledge, skills, and abilities/Needs a formal remedial action work plan: Progressing and/or deficient level of knowledge and performance; consistent growth towards effective performance with routine supervision and/or deficient performance requiring intensive supervision and remediation plan.

Please highlight/circle the rating (1-4) that best describes the resident’s current level of competency for each of the 10 competency areas below. Space is provided for narrative description of the resident’s level of functioning. Please remember that all ratings should be made relative to the level of performance expected given the point of the year at which the evaluation is conducted. Specifically, it is expected that during the beginning of the PPRP, most residents demonstrate basic knowledge, skills and competencies (corresponding to ratings of 1 or 2). As the training year progresses, residents’ knowledge, skills and competencies are expected to increase, that towards the end of the training year, they are expected to demonstrate the minimum level of achievement of intermediate level of competency (corresponding to rating 3). The goal is to help residents achieve advanced levels of competency (corresponding to ratings 4) by the end of the training program.

Level One Competencies: Advanced Competency Areas

I. INTEGRATION OF SCIENCE AND PRACTICE

A. Scientific Research and Resources

4	<p>Advanced knowledge, skills, and abilities Demonstrates the substantially independent and routine application of planning, conducting and critically reviewing practice-based research relevant to quality improvement efforts and integrating the results into practice at an advanced level.</p>
3	<p>Intermediate knowledge skills, and competencies Demonstrates independent competency to critically review practice-based research. Engages in systematic efforts to increase his/her knowledge base of psychology through reviewing and/or implementing research, supervision, and consultation as well as evaluating outcome measures. Demonstrates knowledge and skills in applying evidence based concepts into practice.</p>
2	<p>Basic knowledge, skills, and competencies/ Needs remedial education and training Demonstrates knowledge and the development of skills in seeking, applying, and evaluating theoretical and research knowledge relevant to the practice of psychology. Demonstrates knowledge of application of scientific methods to evaluating practices, interventions, and programs.</p>
1	<p>Minimal knowledge, skills, and competencies/Needs a formal remedial action work plan Evaluation of resident:</p>
<p>Comments:</p>	

II. ETHICAL AND LEGAL STANDARDS AND POLICY

Professional conduct, ethics and laws, and professional standards for providers of psychological services relevant to advanced practice, as appropriate to setting, the population served, and the focus/concentration area.

4	<p>Advanced knowledge, skills, and competencies Demonstrates advanced knowledge of and acts in accordance with each of the following areas: APA Ethical Principles of Psychologists and Code of Conduct; relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional and federal levels, as well as relevant professional standards and guidelines. Independently recognizes ethical/legal dilemmas as they arise, and applies ethical and legal decision-making processes in order to resolve the dilemmas. Independently integrates ethical and legal standards with all competencies.</p>
	<p>Intermediate knowledge skills, and competencies</p>

3	Demonstrates intermediate level knowledge and application of the APA Ethical Principles and Code of Conduct as well as other relevant ethical, legal and professional standards and guidelines. Recognizes ethical/legal dilemmas as they arise and applies ethical and legal decision-making with minimal guidance from the clinical supervisor in order to resolve the dilemmas. Conducts self in an ethical and legal manner in all professional activities.
2	Basic knowledge, skills, and competencies/ Needs remedial education and training Demonstrates basic knowledge and understanding of the APA Ethical Principles and Code of Conduct and other relevant ethical/professional codes, standards, guidelines, laws, statutes, rules and regulations. Demonstrate knowledge and application of an ethical and legal decision-making process with routine supervision from the clinical supervisor. Applies relevant elements of ethical and legal decision-making to dilemmas.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:
Comments:	

III. INDIVIDUAL AND CULTURAL DIVERSITY

Issues of cultural and individual diversity relevant to advanced practice, as appropriate to the setting, the population served and the focus/concentration area.

4	Advanced knowledge, skills, and competencies Demonstrates understanding and independent competency to monitor how one's own personal/cultural history may affect how one interacts with people different from oneself. Evidence knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service; Demonstrates competency independently to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles. Independently applies knowledge in working effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with his/her own.
3	Intermediate knowledge skills, and competencies Demonstrates the understanding and competency to monitor how one's own personal/cultural history may affect how one interacts with people different from oneself. Displays developing knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service; Demonstrates competency to applying awareness and knowledge of individual and cultural differences in the conduct of professional roles. Demonstrates effectiveness in working with the range of diverse individuals and groups encountered during residency.
	Basic knowledge, skills, and competencies/ Needs remedial education and training

2	Demonstrates the competency to monitor and to apply knowledge of self and others as a cultural being in assessment, treatment and consultation, as well as to monitor and to apply knowledge of the role of culture in interactions in assessment, treatment, and consultation of diverse others. Applies knowledge, sensitivity and understanding regarding International Classification of Diseases (ICD) issues to work effectively with diverse others in assessment, treatment and consultation.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:
Comments:	

Level Two Competencies: Program Specific Competencies

IV. PSYCHOLOGICAL INTERVENTION

Knowledge, skills and attitudes in the selection, implementation and evaluation of interventions that are based on the best scientific research evidence; respect for clients’ values/preferences; and relevant expert guidance.

4	Advanced knowledge, skills, and competencies Independently applies integration of psychological science and practice in order to facilitate human development and functioning effectively. Demonstrates knowledge and competency in independently implementing intervention plans that are specific to case and context. Displays clinical skills with a wide variety of clients and uses good judgment even in unexpected or difficult situations. Implements interventions with fidelity to empirical models and flexibility to adapt where appropriate. Independently evaluates treatment progress and modifies planning as indicated, even in the absence of established outcome measures. Demonstrates effective training and supervision of junior member(s) of the profession in developing competence in the area of psychological intervention.
3	Intermediate knowledge skills, and competencies Demonstrates application of knowledge of scientific, theoretical, empirical and contextual bases of intervention, including psychotherapy theory, research and practice. Demonstrates knowledge and competency formulating and implementing evidence-based interventions that takes into account empirical support, clinical judgment and client diversity. Displays clinical skills with clients, and uses good judgment even in unexpected or difficult situations. Evaluates treatment progress and modifies treatment planning as necessary, utilizing established outcomes measures when available. Provides training in psychological intervention to junior member(s) of the profession.
2	Basic knowledge, skills, and competencies/ Needs remedial education and training Demonstrates formulation and conceptualization of cases, and plans interventions utilizing at least one consistent theoretical approach. Displays clinical skills and uses good judgment when working with clients. Implements evidence-based interventions. Evaluates treatment progress and modifies treatment planning as indicated, utilizing established outcome measures when available.

1	<p>Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan</p> <p>Evaluation of resident:</p>
<p>Comments:</p>	

V. PSYCHOLOGICAL ASSESSMENT

Knowledge, skills and attitudes in the selection, administration and interpretation of assessments consistent with best scientific research evidence and relevant expert guidance.

4	<p>Advanced knowledge, skills, and competencies</p> <p>Demonstrates independent ability to select and to implement multiple methods and means of evaluation in ways that are responsive to and respectful of diverse individuals, couples, families and groups and context. Displays advanced understanding of the strengths and limitations of diagnostic approaches and interpretation of results from multiple measure for diagnosis and treatment planning. Independently selects and administers a variety of assessment tools and integrates results to accurately to evaluate presenting question appropriate to the practice site and broad area of practice. Utilizes case formulation and diagnosis for intervention planning in the context of stages of human development and diversity. Independently and accurately conceptualizes the multiple dimensions of the case based on the results of the assessment. Communicates results in written and verbal form clearly, constructively and accurately in a conceptually appropriate manner. Demonstrates the competency of effectively training junior member(s) of the profession in the process of developing competence in the area of psychological evaluation.</p>
3	<p>Intermediate knowledge skills, and competencies</p> <p>Demonstrates competency to select and to implement multiple methods and means of evaluation in ways that are responsive to and respectful of diverse individuals, couples, families and groups and context with minimal guidance from supervisor. Displays understanding of the strengths and limitations of diagnostic approaches and interpretation of results from multiple measure for diagnosis and treatment planning. Demonstrates the competency selecting and administering a variety of assessment tools and integrates results accurately to evaluate presenting questions appropriate to the practice site. Utilizes case formulation and diagnosis for intervention planning in the context of stages of human development and diversity. Accurately conceptualizes the multiple dimensions of the case based on the results of the assessment. Communicates results in written and verbal form clearly, constructively and accurately in a conceptually appropriate manner with minimal guidance from supervisor. Provides training in psychological assessment to junior member(s) of the profession.</p>
2	<p>Basic knowledge, skills, and competencies/ Needs remedial education and training</p> <p>Demonstrates competency in selecting assessment measures with attention to issues of reliability and validity. Demonstrates awareness of the strengths and limitations of administration, scoring and interpretation of traditional assessment measures as well as related technological advances. Displays competency in selecting appropriate assessment measures as well as related technological advances. Selects appropriate assessment measures to answer diagnostic questions. Applies</p>

	concepts of normal/abnormal behavior to case formulation and diagnosis in the context of stages of human development and diversity. Utilizes systematic approaches of gathering data to inform clinical decision-making. Writes assessment reports and progress notes and communicates assessment findings verbally to client.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:
Comments:	

VI. SUPERVISION

Knowledge, skills and attitudes regarding the instruction and oversight of trainees and other professionals.

4	Advanced knowledge, skills, and competencies Demonstrates recognition of the ethical, legal and contextual issues of the supervisor role and brings identified ethical and legal issues to the supervisor’s attention. Demonstrates knowledge of and systematically applies supervision models; demonstrates knowledge of and effectively addresses limits of competency to supervise. Independently engages in professional reflection about one’s clinical relationships with supervisees’ relationship with their clients. Provides effective supervised supervision to less advanced students, peers or other service providers in typical cases appropriate to the service setting.
3	Intermediate knowledge skills, and competencies Demonstrates knowledge of, purpose for, roles of supervision. Displays understanding of ethical and legal issues of the supervisor role. Demonstrates knowledge of and developing skills in applying supervision models. Engages in professional reflection as it pertains to one’s role and relationship with supervisee(s), as well as addressing limits of competency to supervise. Provides supervised supervision to less advanced students, peers or other service providers in typical cases appropriate for the services setting.
2	Basic knowledge, skills, and competencies/ Needs remedial education and training Demonstrates knowledge of, purpose for, and roles of supervision. Identifies and tracks progress achieving the goals and tasks of supervision; demonstrates basic knowledge of supervision models and practices. Demonstrates knowledge of supervision literature and how clinicians develop to be skilled professionals. Provides helpful supervisory input in peer and group supervision.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:
Comments:	

VII. TEACHING

Instruction, disseminating knowledge and evaluation acquisition of knowledge and skill in health service psychology

4	<p>Advanced knowledge, skills, and competencies Demonstrates knowledge of didactic learning strategies and how to accommodate developmental and individual differences. Applies teaching methods in multiple settings, including independent instruction and/or co-instruction of an academic course.</p>
3	<p>Intermediate knowledge skills, and competencies Demonstrates developing knowledge of didactic learning strategies and how to accommodate developmental and individual differences. Applies teaching methods. Assist in co-instruction of an academic course.</p>
2	<p>Basic knowledge, skills, and competencies/ Needs remedial education and training Demonstrates awareness of theories of learning and how they impact teaching. Demonstrates knowledge of application of teaching methods.</p>
1	<p>Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:</p>
<p>Comments:</p>	

VIII. CONSULTATION

Expert guidance or professional assistance in response to a client’s needs or goals

4	<p>Advanced knowledge, skills, and competencies Demonstrates situations that require different role functions and shifts roles accordingly to meet referral needs. Demonstrates knowledge of and ability to select appropriate and contextually sensitive means of assessment/data gathering that answers consultation referral question. Applies knowledge to provide effective assessment feedback and to articulate appropriate recommendations. Applies literature to provide effective consultative services (assessment and intervention) in most routine and some complex cases.</p>
3	<p>Intermediate knowledge skills, and competencies Demonstrates knowledge of the consultant’s role and its unique features as distinguished from other professional roles (such as therapist, supervisor, teacher). Articulates common and distinctive roles</p>

	of consultant and able to compare and contrast consultation, clinical and supervision roles, as well as effectively transitions from one role to another. Ability to select appropriate measures of assessment to effectively answer referral questions. Able to implement a systematic approach to data collection in the consultative role.
2	Basic knowledge, skills, and competencies/ Needs remedial education and training Demonstrates knowledge of the consultant’s role and its unique features as distinguished from other professional roles (such as therapist, supervisor, teacher) and transitions accordingly. Demonstrates knowledge of and ability to select appropriate means of assessment to answer referral questions. Identifies literature and demonstrates knowledge about the process of informing consultee of assessment findings.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:
Comments:	

IX. RELATIONAL

Relate effectively and meaningfully with individuals, groups and/or communities.

4	Advanced knowledge, skills, and competencies Develops and maintains effective relationships with a wide range of clients, colleagues, organizations and communities. Manages difficult communication; possesses advance interpersonal skills. Verbal, nonverbal and written communication are informative, articulate, succinct, sophisticated, and well-integrated; demonstrate thorough grasp of professional language and concepts.
3	Intermediate knowledge skills, and competencies Forms and maintains productive and respectful relationships with clients, peers/colleagues, supervisors and professionals from other disciplines. Negotiates differences and handles conflict effectively; provides effective feedback to others and receives feedback nondefensively. Communicates clearly using verbal, nonverbal and written skills in a professional context; demonstrates clear understanding and use of professional language.
2	Basic knowledge, skills, and competencies/ Needs remedial education and training Displays good interpersonal skills. Displays appropriate affective skills. Negotiates difference and handles conflict satisfactorily. Communicates ideas, feelings and information clearly using verbal, nonverbal and written skills.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:

Comments:

X. REFLECTIVE PRACTICE, SELF-ASSESSMENT, SELF-CARE

Practice conducted with personal and professional self-awareness and reflection; with awareness of competencies; with appropriate self-care.

4	Advanced knowledge, skills, and competencies Demonstrates reflectivity both during and after professional activities; acts appropriately upon reflection; uses self as a therapeutic tool. Accurately self-assess competence in all competency domains; integrates self-assessment in practice; recognizes limits of knowledge/skills and acts to address them; has extended plan to enhance knowledge/skills. Self-monitors issues related to self-care and promptly intervenes when disruptions occur. Independently seeks supervision/consultation as needed.
3	Intermediate knowledge skills, and competencies Displays broadened self-awareness; utilizes self-monitoring; engages in reflection regarding professional practice; uses resources to enhance reflectivity. Demonstrates broad, accurate self-assessment of competence; consistently monitors and evaluates practice activities; works to recognize limits of knowledge/skills, and to seek means to enhance knowledge/skills. Monitors issues related to self-care with supervisor; understands the central role of self-care to effective practice. Effectively participates in supervision.
2	Basic knowledge, skills, and competencies/ Needs remedial education and training Displays basic mindfulness and self-awareness; engages in reflection regarding professional practice. Demonstrates knowledge of core competencies; engages in initial self-assessment regarding competencies. Understands the importance of self-care in effective practice; demonstrates knowledge of self-care methods; attends to self-care. Demonstrates straightforward, truthful and respectful communication in supervisor relationship.
1	Minimal knowledge, skills, and competencies/ Needs a formal remedial action work plan Evaluation of resident:

APPENDIX C

NOVA SOUTHEASTERN UNIVERSITY
POSTDOCTORAL RESIDENCY PROGRAM
Evaluation of Training Program

Date:

Period covered:

This evaluation is to be a collaborative process designed to facilitate growth, to pinpoint areas of strength and difficulty, and to refine goals. It is a tool for evaluating performance and also a vehicle for change.

Scale for rating program areas:

- 5 = Outstanding
- 4 = Very good, above average
- 3 = Average, accepted and typical level
- 2 = Below expected level
- 1 = Very poor
- N/A = Not Applicable

1. Professional Atmosphere

- _____ Adherence to APA ethical guidelines
- _____ Commitment to serving the psychological needs of clients
- _____ Active collaboration and cooperation between staff members
- _____ Respect for and use of, professionals from other disciplines
- _____ Commitment to science and profession of psychology
- _____ Awareness of, and respect for, individual differences among clients and professionals
- _____ Respect for human rights of clients and professionals
- _____ Opportunity for professional development
- _____ Opportunity for research activities

2. Training Atmosphere

- _____ Commitment to training
- _____ Responsiveness of program to personal and individual training needs

_____ Accessibility of staff for supervision, consultation, and other training needs

_____ Adequate role models

_____ Atmosphere conducive to intellectual stimulation and professional growth

_____ Breadth of experience

_____ Depth of experience

_____ Challenging program

3. Direct Service: Please rate your experiences in these areas:

_____ General Professional Practice

Comments:

_____ Scholarly Research

Comments:

_____ Psychological Assessment

Comments:

_____ Psychotherapeutic Interventions

Comments:

_____ Supervision/ Consultation/Teaching

Comments:

4. Training Received: Please rate your experiences in these areas:

_____ Individual supervision (received)

Comments:

_____ Individual supervision (given)

Comments:

5. What are the strengths of this training program?

6. What are the limitations of this training program?

7. Recommendations:

8. Given the rapid changes in health care and employment opportunities in psychology, what would you like to see included in current training which would help residents to be better prepared?

9. Please rate the training program overall in helping to prepare you as a psychologist (circle):

Excellent Above Average Average Below Average Poor

10. Please rate the training program as meeting your own expectations:

Excellent Above Average Average Below Average Poor

11. Additional comments:
