OVERVIEW OF CLINICAL EXPERIENCE

Primary responsibilities as ***Trainer and Lead Therapist*** at the Center for Treatment Research on Adolescent Drug Abuse (CTRADA). Under the direction of Howard Liddle, Ed.D., CTRADA has received NIDA funding for projects focusing on the development, testing and transportation of Multidimensional Family Therapy (MDFT) in both local, national and international clinical settings. Specific job functions include:

- Provide developmentally and contextually oriented family based treatment- Multidimensional Family Therapy (MDFT) to adolescents and their family members within the home and school
- Integrate Family Therapy, Individual Therapy, Parent Therapy, and Drug Counseling methods into a theory- driven comprehensive approach
- Mediation with court officials and psychiatric services for clients and their families
- Crisis intervention counseling on a 24 hour basis
- Provide clinical supervision and training in MDFT to therapists receiving training in the model in funded projects locally and internationally
- Assist in the development of a new family-based brief therapy
- Collaborate with research department investigating the therapeutic mechanisms of action to comprehend effectiveness of approach and gender related issues in adolescent treatment for substance abuse
- Teach research and family therapy courses (Statistical Method, Program Evaluation, Qualitative Research, Research Methods, Assessment, Philosophy of Science ,Family Therapy, couples therapy, Career development)

Engage in numerous additional professional activities, including:

- Instructor for graduate-level courses family therapy, qualitative research, and assessment
- Involvement in other research projects

- Guest lecturing/co-facilitating in graduate classes
- Conversing with colleagues about new possible research projects and grant proposals.
- Involvement in the writing and submission of several grant proposals to the National Institutes of Health, National Institute on Drug Abuse

Other clinical experiences garnered through clinical training and employment include:

- Consulting with faculty in the design of research-based clinical interventions for Haitian youth and families
- Working as an assessor testing academic and emotional functioning of preschool children
- Working in a classroom setting with students, teachers, parents and school administrators
- Providing group and individual counseling for at-risk elementary and high school students
- Assessing and referring families to services to assist in dealing with at-risk youth
- Coordinating parent skills training and youth career development programs
- Working directly with special education children in a pre-school setting
