Where It Can Take You
As a graduate of this program, you’re ready for advanced study of psychology, pharmacology, medicine, and neurobiology. With many choices ahead of you, career options include physician, researcher, cognitive or behavioral psychologist, audiologist, and speech or physical therapist.

Become a Leader
artificial intelligence researcher
audiologist
biochemist
counselor/therapist
neuroscientist
pharmacist, pharmacologist
physical therapist
physician, physician assistant
professor, instructor, lecturer, teacher
psychiatrist, psychiatric technician
psycho-linguist
psychologist
research scientist, research associate, research assistant, research technician
speech therapist

B.S. in Behavioral Neuroscience
What could be more fascinating than how the brain controls behavior, thought, and emotion? Focus your studies on the brain to learn about the organization and function of the nervous system, from the molecular to the behavioral level. This program prepares you to enter careers in neuroscience, research, pharmacy, psychology, medicine, computational modeling, and other in-demand fields.

What You’ll Study
You’ll investigate the brain’s connection to memory, sleep, perception, balance, and mental illness. After covering many of these fields, a senior seminar in behavioral neuroscience ties together the major’s multidisciplinary nature.

How You’ll Learn More
Our professors are experts in the related fields of biology, psychology, and chemistry. You’ll have the chance to study and work alongside them—and the college’s graduate students—in our labs and clinics. Your joint research could be presented at national conferences.

Unique Opportunities
- local, national conferences: attend or present your original research
- psychology graduate research series: attend presentations by students in the college's master's and doctoral programs
- national honor societies: join based on your academic achievement
- distinguished speakers series: attend discussions by renowned authors, scientists, political figures, and artists
