[15 or higher = Competency Attainment]

COMPETENCY DOMAIN 2: Case Conceptualization and Treatment Formulation

Theoretical Model(s) 3. Is able to articulate a professionally accepted theoretical approach and/or a set of empirically validated procedures or systematically integrate two or more such approaches with evidence of significant depth of understanding of these approaches. (4-5 points) 2. Is able to describe a theoretical approach or integration of two or more such approaches with adequate depth of understanding of the theories. (1-3 points) __1. Presents a theoretical approach reflecting little depth of understanding and/or integrates two or more such approaches inappropriately or in a way that violates the assumptions of those theories. (0 points) Relevance 3. The approach is based on a careful consideration of client and therapist goals and a thorough assessment of all of the most clinically relevant issues that are presented (i.e. suicidal behavior, history of sexual abuse, substance abuse, severe psychopathology). (4-5 points) 2. The approach reflects basic or superficial goals and an assessment that addresses the most obvious issues, while ignoring more subtle issues or those that would have required a more careful evaluation. (1-3 points) _1. The approach ignores the client's most important goals and needs and fails to address the most clinically relevant issues, while focusing on superficial problems. (0 points) Integration 3. The conceptualization incorporates the client's unique history, current problems and personality style and applies the theoretical model and/or the empirically validated approach to the actual data of the client's life in a highly individualized manner. (4-5 points) 2. The formulation incorporates some important data of the client's life but fails to account for much of the relevant history or life situation, appealing to theoretical assumptions from the model without adequate empirical support. (1-3 points) 1. The conceptualization relies mostly on theoretical constructs and offers little in the way of integration of relevant historical, mental status or personality variables that are empirical. (0 points)

Flexibility of Approach

Outcome/Self-Critique

3. Clearly describes and documents client outcome and understands and is able to self-critique and explain the basis for success or failure of the intervention as well as his/her therapeutic errors or oversights. (4-5 points)
2. Is able to describe client outcome, but is limited in the ability to self-critique and explain the basis for success or failure of the intervention. (1-3 points)
1. Cannot clearly describe or document client outcome and is unable to self-critique and explain the basis for the success or failure of the intervention. (0 points)
Case Conceptualization and Treatment Formulation Subscore (0-40) [28 or higher = Competency Attainment]
COMPETENCY DOMAIN 2. Polotionship/Intervention Skills
COMPETENCY DOMAIN 3: Relationship/Intervention Skills
Listening
3. Listens effectively to client, responds to their verbalizations without introducing new questions, unless clinically indicated, and demonstrates that they are following client's train of thought with few interruptions or digressions. (4-5 points)
2. Follows client's train of thought, typically responds to some last or preceding comment without introducing new data, unless clinically indicated, but has tendency to talk too much or direct the discussion too often or inappropriately. (1-3 points)
1. Fails to listen to client, does not follow client's lead or train of thought and directs the interview with little regard for client's initiative. (0 points)
Understanding/Empathy
3. Uses reflection of feeling and content and accurately communicates an understanding of client feelings, attitudes and concerns. (4-5 points)
2. Uses reflection of either feeling <u>or</u> content and is able to communicate an adequate level of understanding, but often misses the client's major concerns. (1-3 points)
1. Does not utilize effective empathy skills and is unable to communicate adequately their understanding of the client's expressed concerns. (0 points)

Questioning

3. Uses open-ended questions as appropriate that facilitate the client's exploration of problems and concerns. (4-5 points)
2. Is able to use open-ended questions appropriately, but falls back frequently upon closed ended questioning that limits client exploration. (1-3 points)
1. Questioning tends to be inappropriately closed-ended and rarely facilitates adequate exploration or explanation of the client's difficulties. (0 points)
Other facilitating techniques
3. As appropriate, uses clarification, confrontation, feedback, summary statements and silences in exploring client issues. (4-5 points)
2. Is able to employ clarification, summary statements, feedback and silences when appropriate, but does so ineffectively or too infrequently to enhance client exploration of problems. (1-3 points)
1. Even when appropriate, rarely if ever uses clarification, feedback, silences or summary statements to enhance exploration of client issues. (0 points)
Fidelity of Intervention
3. The taped session reflects many interventions that accurately reflect the proposed conceptual/theoretical/empirical framework offered by the student. (5-8 points)
2. The taped session has some evidence of clinical interventions that are consistent with the student's conceptualization, but the interventions are often unrelated or inconsistent with the model proposed. (1-4 points)
1. The taped session reflects little or no correspondence with the student's treatment model. (0 points)
Relationship/Intervention Sub-Score (0-28) [19 or higher = Competency Attainment]

COMPETENCY DOMAIN 4: Written Exposition				
3. The written document is clearly and concisely written, comprehensive in covering the relevant dimensions of the case and is free of any errors in grammar and spelling. (6-10 points)				
2. The document is sufficiently comprehensive, but may lack clarity at times or occasional errors in spelling and grammar. (1-5 points)				
1. The written document is poorly written, omits important information and/or has many errors in spelling and grammar. (0 points)				
Written Exposition Subscore (0-10) [7 or higher = Competency Attainment]				
Assessment and Diagnosis Subscore(0-22) Case Conceptualization and Treatment Planning Subscore(0-40) Relationship/Intervention Subscore(0-28) Written Exposition Subscore(0-10) Total CCE Score(0-100) [70 or higher = Competency Attainment]				
If scores on all competency domains are 70% or higher: PASS If scores on ANY of the competency domains are 70% or less: REMEDIATE
