**BRIEF OVERVIEW OF PROGRAM:**

ATC provides state of the art diagnosis, assessment, and treatment for adults with anxiety and other comorbid psychiatric and/or medical conditions. ATC specializes in the treatment of panic, social anxiety, GAD, specific phobias, and OCD. Students may also treat comorbid depressive, personality, trauma/PTSD, sleep, and alcohol/substance use disorders. Students will be trained in the most current manualized, evidence-based treatments which provide a nice structure for new clinicians. Students have the opportunity to learn CBT, ERP, ACT, DBT, PE and CPT. Students will also be trained in several evidence-based diagnostic/assessment measures (SCID, ADIS, WAIS, MoCA, etc.). Students will learn how to administer, score, interpret measures, and write integrated reports. Students will learn effective documentation/writing, treatment planning, and develop strong clinical skills. Training is intended to prepare students for successful CCE defense and internship placement. Opportunities may also exist to assess and treat patients in Spanish, deliver talks to the community, and/or participate in research projects.

**TEMPORARY PROGRAM/SUPERVISION/REQUIREMENT ALTERATIONS DUE TO COVID-19:**

The CLC is currently under a lock down, which means that providers are not permitted inside the unit. At this time, all services including assessment and psychotherapy are being provided via phone calls and VOD. Given such limitations, trainees will require a higher level of supervision to provide services, which means the supervisor will have to be on the call at all times during evaluations and psychotherapy. The VA is currently searching for new ways to better accommodate trainees. The limitations to supervision will decrease the amount of cases the trainee will see during COVID-19.
