M.S. in Experimental Psychology

The Master of Science in Experimental Psychology degree program provides students with a strong academic foundation in the theories and concepts of experimental psychology. Through focused coursework and the experience of mentored independent research, students are equipped with comprehensive skills in scientific inquiry and research methodology. These skills prepare students for admission into a doctoral program in psychology or for career opportunities that include teaching and research in industrial, government, private consulting, health care, and community settings.

Why Pursue an M.S. in Experimental Psychology?

- to develop mastery of advanced theoretical, statistical, and methodological foundations of experimental psychology
- to prepare for a professional career as a researcher and experimental psychologist
- to prepare for admission into a doctoral program in psychology

Graduates of this program can pursue doctoral education in subfields of experimental psychology or become leaders in a variety of professional positions and settings, including, adjunct professor, business/government agency, psychology lecturer, research project manager, statistical consultant, and lab manager.
