Introduction

The Handbook of Field-Based Training Experiences in School Psychology was prepared to assist doctoral students in school psychology at the College of Psychology at Nova Southeastern University (NSU) as they engage in practicum training. Candidates should consult the Doctoral Program in School Psychology Policies and Procedures Handbook for general guidelines and policies of the program.

To prepare candidates adequately to meet the current and future expectations of the field, the program recognizes the need for school psychologists who are leaders and are accomplished in prevention, assessment, consultation, and intervention at the individual and systems levels. It is the school psychologist’s expertise in assessment, viewed in its broadest context, which guides the practicing professional in providing the most effective services. That is, assessment, directly linked to intervention for the purposes of both prevention and remediation of student difficulties, is the key to meeting the complex needs of schools today. Consequently, candidates are prepared to offer a broad continuum of innovative, evidence-based, and individually-targeted services. Training builds upon a foundation of scientific knowledge and develops the skills necessary for professional competence. It prepares candidates to be lifelong learners as well as interpreters and utilizers of research through mentorship in the process of scientific investigation and evaluation. Intensive, sequential, field-based experiences are designed to provide candidates the opportunities to apply and to integrate methods of prevention, psychological assessment, consultation, and intervention. The program emphasizes the importance of delivering school psychological services within a collaborative framework. Candidates learn to view problems from a systems perspective, focusing on the dynamic interrelationships among learners, families, schools, and communities. Training emphasizes an awareness of, sensitivity to, and respect for diversity and individual differences within the context of each of these systems. Awareness of these unique differences is emphasized in every domain of practice. Development of technological competencies is similarly woven throughout the curriculum to train school psychologists to deliver services in the most efficient and student-centered manner.

PURPOSE

As part of the applied field-based requirements of the doctoral program in school psychology at Nova Southeastern University, candidates must successfully complete three years of practica which are linked to the curriculum. These practica include Foundations I, II, & III; School-Based I & II; and Advanced Assessment and Interventions I, II, & III. In addition, candidates must complete a minimum of 600 hours in a PK-12 setting at the internship level. The final training year culminates in the doctoral internship. These experiences take place during each year of the curriculum, thus allowing candidates to bridge the gap between theoretical foundations and applied professional practice. As candidates learn theories and techniques within the classroom, they begin to practice and to apply these skills under close supervision. The goal of the field-based phase of training is to provide supervised experiences that will enhance the development of each candidate’s knowledge and skills as they develop a professional identity as a health service provider. Field-based experiences were designed based upon the standards set forth by the American Psychological Association (APA), the National Association of School Psychologists (NASP), and the Florida Department of Education (DOE).
PRACTICA

The practicum sequence is intended to provide the candidate with exposure to a broad range of school psychological service delivery models and closely supervised assessment, consultation, and intervention experiences. Practicum settings include placements at the Mailman Segal Center for Human Development (MSC), the University School of Nova Southeastern University, and the School-related Psychological Assessments and Clinical Interventions (SPACI) Clinic in the Psychology Services Center (PSC), all on the NSU campus and closely supervised by program faculty. In addition, each summer, candidates are placed in the Summer Reading Explorers Program (SREP) serving diverse children from failing schools as part of a service and research grant addressing needs of children at-risk for academic failure. Additional practicum experiences may include local school districts, clinics, and agencies in the community. These practicum settings provide candidates the opportunity to work with a diverse range of clients and problems.

Candidates begin practicum training during the first semester of graduate education and are required to engage in three years of applied experiences which occur in a developmentally and sequentially organized fashion. Each practicum experience allows candidates to bridge the gap between theoretical foundations and applied clinical practice. As candidates learn skills in the classroom, they engage in the application of these skills in applied settings under close supervision, both on-site as well as in consultation with program faculty in the classroom. The goal of the practica is to provide supervised applied experiences with a focus on practice-informed-by-science that will enhance knowledge and skills of candidates as they develop professional identities as health service providers.

APPLYING FOR PRACTICA

Administrators and/or faculty of the doctoral program in school psychology will approve the candidate’s readiness for practicum based upon grades, professional behavior, and completion of the annual Student Survey. In order to progress through the program, and to be eligible for practica, all candidates must attain minimum levels of achievement (MLA) of 80% or higher on each assessment of competence. Any candidate who obtains a score lower than 80% is required to engage in a remediation process with the instructor to attain the MLA. School psychology candidates who do not meet the minimum requirements will be advised and remediated as appropriate.

Practicum placement procedures vary depending on setting. Candidates must abide by the differing guidelines. Certain sites may require students to complete a security clearance, which may include, but not be limited to, a background screening and fingerprinting. Candidates are responsible for the cost of their own fingerprinting and background checks for practica and internships. Candidates with any concerns about this issue should seek advisement at the beginning of their graduate education.

Candidates are not eligible for practicum if they have not completed prerequisite courses, have not attained the MLA of 80%, are on academic probation, or have been deemed not ready based upon the Annual Review process or the determination of the Professional Standing Committee (PSC) within the college. Such evaluation would follow written referral by members of the faculty or university staff, a determination of sufficient concern by the faculty mentor and program director based upon Annual Review, or a finding by the Professional Standing Committee (PSC) that the
candidate is not ready for practicum. Such findings will include specific, required remedial actions.

To be eligible to register for practicum, candidates must have successfully completed or be co-enrolled in the following course work:

**Practicum in School Psychology: School Based I & II**
To be eligible to register for the school-based practica, candidates must have successfully completed earning a grade of “B-” or higher, or be co-enrolled in the following courses:

- PSY 8100 – Development: Child and Adolescent
- PSY 8110 – Psychology of Exceptional and At-Risk Children
- PSY 8115 – Child and Adolescent Psychopathology
- PSY 8135 – Organization and Operation of Schools
- PSY 8150 – Counseling Theories and Techniques
- PSY 8190 – Practicum in School Psychology: Foundations I
- PSY 8195 – Practicum in School Psychology: Foundations II
- PSY 8197 – Practicum in School Psychology: Foundations III
- PSY 8165 – Applied Behavioral Assessment and Intervention
- PSY 8255 – School Consultation Skills
- PSY 8270 – Ethical, Legal, and Professional Issues for School Psychologists
- PSY 4442 – Evidence-Based Treatment of Emotional and Behavioral Disorders of Children and Adolescents

**Practicum in School Psychology: Advanced Assessment & Interventions I, II, & III**
To be eligible to register for these practica, candidates must have been matriculated and have successfully completed earning a grade of “B-” or higher or be co-enrolled in the following course work:

- PSY 8290 – Practicum in School Psychology: School-Based I
- PSY 8295 – Practicum in School Psychology: School-Based II
- PSY 8182 – Cognitive Assessment I: Theory, Research, and Practice with Lab
- PSY 8184 – Cognitive Assessment II: Linking Assessment to Intervention
- PSY 8280 – Academic Assessment for Intervention
- PSY 8286 – Assessment of Personality and Social-emotional Functioning for Intervention
- PSY 8292 – Comprehensive Data-Based Decision-Making: Integrated Report
In this first year practicum, candidates complete 480 hours over the course of three semesters (i.e., a minimum of 12 hours per week, 25% of which should be direct client contact). The purpose of this practicum is to provide candidates with an introductory field-based experience linked to a university seminar in which candidates engage in applied experiences necessary for providing school psychological services.

Practicum in School Psychology – Foundations I: Public Schools
During the first semester of graduate education in Foundations I, candidates are expected to gain an understanding of the roles and functions of school psychologists practicing in PK-12 settings, as they complete a minimum of 4 hours per week within the public schools. Here, they observe school psychologists engaging in a variety of activities including: conducting psychological screenings and assessments; consulting with teachers and other school personnel, as well as parents; developing, implementing, monitoring and evaluating evidenced-based and individualized interventions; participating in child study/intervention assistance team meetings; and providing feedback and consultation to parents and school personnel.

Practicum in School Psychology – Foundations I and II: Mailman Segal Center
In Foundations I and II at the Mailman Segal Center, candidates are expected to develop their knowledge and skills in working with young children as well as those with developmental disorders (i.e., 8 hours per week for semester one; 12 hours per week for semester two). Through a field placement in a preschool which provides services to typically developing children (birth-5), as well as children diagnosed with autistic spectrum disorder, candidates develop an understanding of how to create and to support nurturing environments to foster optimal academic, behavioral, and social emotional developmental outcomes. Moreover, candidates learn about specialized programs for children with disabilities, including the role of the various specialists and team members. Candidates develop skills in interviewing and collaborating with parents and teachers; reviewing the literature to design and to deliver in-service presentations on relevant and timely topics to stakeholders; conducting various observations for the purposes of educational planning, intervention monitoring, and evaluation; supporting teacher instruction and behavioral intervention in the classroom; and administering and scoring preschool screeners and assessments (e.g., Battelle Developmental Inventory) to children.

Practicum in School Psychology – Foundations III: Summer Camp and School-related Psychological Assessment and Clinical Interventions (SPACI) Clinic
During the summer semester of the first year, candidates are expected to develop more advanced understanding and practice in creating and supporting effective learning environments and multi-tiered systems of supports (MTSS) within school and out of school settings (afterschool and summer camp settings) by completing a minimum of 120 hours in the field (i.e., approximately 8 hours per week for 15 weeks). Under close supervision, candidates conduct universal screenings and other assessments of diverse young children to determine intervention needs; score screening instruments and organize data for tier II decision-making; implement small-group targeted evidence-based literacy interventions; provide behavioral supports for children who are not engaging effectively in small group instruction; assess intervention integrity for tier I and tier II small group programming; and conduct post intervention assessments.
For all practicum courses in the Foundations sequence, in addition to the supervision provided by the supervisor at the practicum site, candidates participate in a seminar/group case consultation course conducted by a school psychology program faculty member. Through integration and consideration of content and skills addressed in first year coursework, assigned course readings, and discussion of field-experiences, candidates receive input regarding their practicum experiences, which serves to strengthen their professional identity as health service providers, and serves to provide practice in and support of their efficacy in the delivery of school psychological services.

**PRACTICUM IN SCHOOL PSYCHOLOGY: SCHOOL BASED I AND II**

During the second year of coursework, candidates are required to complete two semesters of school-based practica, totaling a minimum of 450 hours (i.e., 15 hours per week, 50% of which should be direct client contact). This practicum is designed as an integrative experience to blend theory with practice in serving children and adolescents, as well as key stakeholders in their environments. With foundational coursework complete, candidates begin to demonstrate assessment and intervention competencies as they work in school settings to deliver psychological services under close supervision. Practicum responsibilities may include individual and small-group counseling and/or skills training; consultation with parents, teachers, and/or other school personnel; teacher in-service training; parent conferencing/training; progress monitoring; presentation of psychoeducational programs; individual and large group assessment; involvement in the exceptional student education process; and other experiences relevant to the practicum setting. By using an evidence-informed problem-solving model, candidates engage in data-based decision making and hypothesis generation and testing, as well as intervention development, implementation, monitoring, and evaluation at individual and group levels. Further, they are required to apply ethical and legal professional standards, and to integrate technology and research-informed practices as they work in their assigned schools.

In addition to the supervision provided by the supervisor at the practicum site, candidates participate in a group case consultation course during each semester of practicum by a school psychology program faculty member. This weekly, three-hour group case consultation session provides input to students regarding their practicum experiences, strengthens their professional identity as an emerging school psychologist, and serves to support their efficacy in the delivery of school psychological services.

Also during the fall and winter semesters of Year 2, candidates will begin his or her work at the School-related Psychological Assessment and Clinical Interventions (SPACI) Clinic. Here, they shadow a third-year student on clinical cases and participate in parent and child interviews, assessments, interventions, school observations, etc.
During the third year of coursework, candidates are required to enroll in a three credit-hour course for three semesters entitled Advanced Assessment and Interventions (AA&I) I, II, and III. This 720-hour (minimum, 50% of which should be direct client contact) practicum provides a mechanism for candidates to apply further the techniques of assessment, consultation, and direct intervention and to expand experiences in clinic settings and/or community agencies.

During the summer semester in AA&I, candidates return to the Summer Reading Explorers Enhanced Reading Services camp. Here, candidates serve as supervisors of program interventionists and assessment staff, assess integrity of intervention implementation, consult with staff and parents regarding child behavior and academic difficulties, engage in decision-making regarding grouping of students for intervention and progress monitoring, and conduct group parent engagement activities to foster literacy development in the home.

During the winter semester in AA&I, each candidate will be assigned assessment/intervention cases in the SPACI clinic. For each case, candidates will conduct/review developmental and social histories and access available school and community resources to determine appropriate assessment instruments to be used with each case. They will administer, score, and interpret traditional assessment measures as well as utilize functional assessments and progress monitoring techniques and behavioral observations as appropriate. Candidates will integrate assessment data and provide verbal and written feedback to parents and teachers, when appropriate, based on findings. Based on assessment results, candidates will make initial recommendations, identify school and community resources to assist the client/family, and make referrals to agencies as appropriate. They will provide recommendations to schools and other agencies for cognitive and academic goals, and they will provide recommendations on methods of monitoring progress toward the accomplishment of goals. The candidate will integrate progress-monitoring data and their analysis of the data with assessment data from the comprehensive evaluation when finalizing a comprehensive written psychological report and when providing additional recommendations to parents and key stakeholders.

In addition, candidates will be assigned to select, to complete, and to evaluate academic and/or behavioral interventions with selected cases. Based on available assessment data and a collaborative problem-solving process, each candidate will identify behavioral or academic areas to target with individual, direct intervention. The interventions can be academic or behavioral but must be based on the individual needs of the students and evidence-based practices. The candidate will select appropriate progress monitoring tools to use to collect baseline data and to measure response to the intervention and progress toward a predetermined goal. The candidate will design and deliver the interventions. Frequent, targeted progress monitoring will take place throughout the delivery of the intervention and will guide each candidate’s data-based decision making.

During the completion of AA&I II and III, candidates continue to see cases at the SPACI clinic and may return to the USchool or another agency in the community for more advanced experiences. During the winter semester, candidates extend their placement at SPACI or the USchool, ChildNet, or other community agency. For example, during this practicum, candidates
may develop advanced psychotherapy skills in working with specialized populations (e.g., autism spectrum disorders, emotionally and behaviorally disturbed, chronically abused), or further enhance their psychological assessment skills with difficult and diverse cases. These decisions are based upon candidate interests, goals, and skills.

During their third year of practicum, students display the capacity to work more independently, albeit always under close supervision. Candidates further develop competencies in the areas of prevention, assessment, consultation, and intervention with expanded populations in varied settings. Peer consultation/supervision with advanced students, as well as doctoral and post-doctoral interns occurs during an additional component during this year of training. By the end of the third year of practicum, candidates are expected to possess readiness for internship through their knowledge and skills.

In all instances, practicum experiences are integrated with other elements of the program and candidates have continuing opportunities to discuss their practicum experiences in a variety of ways. In addition to on-site supervision, all candidates engage in weekly case consultation/review with a faculty member within the context of a formal course. In the event of challenges during the completion of practica, candidates first consult with the site supervisor/faculty member, and can also contact the Program Director or Program Administrator in person, via telephone, or e-mail regarding their practicum experiences or problems.
## SAMPLE PRACTICUM TRACKS

| **2nd Year – Summer** | - Summer Reading Explorers Program (SREP) as a student supervisor  
- One voluntary SPACI case in conjunction with SREP |
| **3rd Year – Fall/Winter** | - Continue with SPACI (can include assessment and potentially therapy cases) full-time taking three assessment cases each semester for a total of 6 cases |
| **3rd Year – Summer** | - Elective practicum (e.g., ChildNet, Head Start, etc.) |
| **4th Year – Fall/Winter** | - Continue with elective practicum and add elective 600-hour school psychology internship at University School |
CERTIFICATION IN SCHOOL PSYCHOLOGY

Candidates seeking initial certification as a school psychologist must complete 1200 hours in a PK-12 school setting in order to be considered a Florida Department of Education (DOE) “completer,” and to be eligible for certification in the state of Florida and many other states. All candidates are required to complete at least 600 hours in a PK-12 setting prior to graduation, which will allow them to be eligible for national certification as school psychologist (NCSP) by the National Association of School Psychologists (NASP). The school-based hours may be obtained during the completion of the 2000-hour doctoral internship, a 1200-hour internship, or an elective 600-hour internship in school psychology. Alternatively, a candidate may complete an elective internship in school psychology within an approved PK-12 school setting during their fourth year of study, prior to applying for a doctoral-level internship. Supervision must be provided by a psychologist holding the appropriate state psychology credential for practice in the internship setting.

DOCTORAL INTERNSHIP IN SCHOOL PSYCHOLOGY

The final field-based training experience of the doctoral program requires the completion of a 2000-hour, 12-month culminating professional practice experience under the supervision of a licensed psychologist (which must be verified prior to accepting an internship offer). This 2000-hour internship may occur full-time over 52 weeks, or half-time over two consecutive years. The internship experience enables candidates to demonstrate required competencies and to refine skills in prevention, assessment, consultation, and intervention, preparing them for independent functioning as a health service provider.

Pre-requisite Courses for the Doctoral Internship

Completion of all coursework, including PSY 8206 Directed Study, is required in order to begin the doctoral internship. It is the candidate’s responsibility to investigate and to apply for internship opportunities. Prior to submitting the application, the Program Director will verify the candidate’s eligibility to apply for an internship based upon Annual Review. Because of the competitive nature involved in the process of obtaining an internship, each candidate is required to apply to multiple settings as advised by faculty and administrators. To accept an internship placement, a candidate must be in good academic standing and have successfully completed all academic requirements as described above.

Candidates are referred to the Doctoral Program in School Psychology Internship Application Guidelines for additional information regarding the internship application process.

POST-DOCTORAL RESIDENCY

Candidates are strongly encouraged to apply for and to obtain an appropriate, 2000-hour post-doctoral residency to focus on specific areas of subspecialty interest and to make them eligible for licensure in states which require a post-doctoral residency. While this is not a degree requirement, the program strongly encourages its graduates to obtain licensure as a psychologist.
ETHICAL BEHAVIOR

Candidates, faculty, and staff are responsible for abiding by the ethical principles of the American Psychological Association (APA), the National Association of School Psychologists (NASP), the State Board of Education, rule 6B-1.001, FAC, and the State of Florida Statutes for Licensed Psychologists (Title XXXII, Chapter 490) and must conduct themselves in accordance with those principles. Internet links to the American Psychological Association Ethical Principles of Psychologists and Code of Conduct, the National Association of School Psychologists Guidelines for the Provision of School Psychological Services, and Principles for Professional Ethics, the Code of Ethics of the Education Profession in Florida as well as the State of Florida Statutes for Licensed Psychologists (Title XXXII, Chapter 490) are available at the end of this document in Appendix M. Candidates are responsible for reading, understanding, and being prepared to utilize the information gleaned from these documents prior to their field-based training experiences. In conjunction with the initiation of the first field-based training experience, all candidates will complete NSU didactics in the Health Information Portability and Accountability Act (HIPAA) and the Family Educational Rights and Privacy Act (FERPA) in addition to watching a personal safety video entitled “Some Common Sense Safety Issues.” Additionally, candidates must adhere to policies, procedures, rules and regulations of the agency/school where his or her practicum/internship will be completed.

CORE PERFORMANCE STANDARDS FOR ADMISSION AND PROGRESS

The standards required for admission are designed to protect the safety and well-being of clients whom its graduates will eventually serve in applied settings. Candidates for the degree must possess with or without reasonable accommodation(s), multiple abilities and skills including intellectual, conceptual, integrative, and quantitative abilities; and interpersonal, communication, behavioral, and personal skills and attributes including empathy, emotional self-awareness, and emotional maturity.

Candidates in professional psychology programs (at the doctoral, internship, and/or postdoctoral levels) should be aware that faculty, training staff, supervisors, and administrators have a professional, ethical, and potentially legal obligation to assess competence in the areas of emotional stability and well-being, interpersonal skills, professional development, and personal fitness for practice and to ensure—insofar as possible—that the candidates who complete the program are competent to manage future relationships (e.g., client, collegial, professional, public, scholarly, supervisory, teaching) in an effective and appropriate manner. Because of this commitment, the program strives not to advance, to recommend, or to graduate candidates with demonstrable problems (e.g., cognitive, emotional, psychological, interpersonal, technical, and ethical) that may interfere with professional competence to other programs, the profession, employers, or the public at large.

Within a developmental framework, and with due regard for the inherent power difference between candidates and faculty, candidates must realize that their faculty, training staff, and supervisors will evaluate their competence in areas other than, and in addition to, coursework, seminars, scholarship, comprehensive examinations, and related program requirements. These evaluative areas include, but are not limited to, demonstration of interpersonal and professional competence;
self-awareness, self-reflection, and self-evaluation; openness to processes of supervision; and resolution of issues or problems that interfere with professional development or functioning. Evaluation and remediation of these issues may be accomplished by such activities as assessing constructive responses to feedback from supervisors or program faculty, successful completion of remediation plans, participation in personal therapy in order to resolve issues or problems, etc.

This policy is applicable to settings and contexts in which evaluation would appropriately occur (e.g., coursework, practica, supervision), rather than settings and contexts that are unrelated to the formal process of education and training (e.g., non-academic, social contexts; social network postings). However, irrespective of setting or context, when a candidate’s conduct clearly and demonstrably impacts program performance, development, or functioning; raises questions of an ethical nature; represents a risk to public safety; or damages the representation of psychology to the profession or public, appropriate representatives of the program may review such conduct within the context of the program and the Center’s evaluation processes.

(Adapted from the comprehensive evaluation of the student-trainee competence in professional psychology programs. Retrieved from http://www.psychtrainingcouncils.org/NCSPPCCTCmodelStudentCompetency.pdf)

PROFESSIONAL BEHAVIOR

Professional functioning as a school psychologist includes a number of specific, observable behaviors. These behaviors fall into three broad categories and include the following:

1. Professional Behavior
   a. Demonstrates dependability (e.g., punctuality in submitting papers and assignments, meeting with clients, etc.)
   b. Accepts responsibility for one’s own work (e.g., presenting passages as one’s own from the internet or other source is plagiarism)
   c. Follows through and completes tasks
   d. Seeks guidance from appropriate sources

2. Intrapersonal Behavior
   a. Displays mature and appropriate behavior
   b. Demonstrates ability to function independently
   c. Exhibits usual and customary judgment and discretion in both student and professional activities
   d. Presents a generally respectful and non-hostile attitude
   e. Participates in activities that are pursuant to professional development
   f. Develops intrinsic criteria to evaluate own performance
3. Interpersonal Behavior
   a. Cooperates with and is respectful of others
   b. Gives, accepts, and utilizes feedback effectively
   c. Develops and maintains positive relationships with peers and faculty
   d. Develops satisfactory working relationships with supervisors and advisors
   e. Respects human diversity
   f. Communicates appropriately and affectively
   g. Demonstrates ethical responsibility
   h. Adapts well to new situations

Information regarding professional behavior and appropriate conduct for the College of Psychology can be found in the *Doctoral Program in School Psychology Policies and Procedures Handbook*. Information on the review process for alleged violations of the University Student Code of Conduct, including academic standards and ethical standards for field placements are reviewed in the section titled *Professional Standing Committee*.

**PROFESSIONAL LIABILITY INSURANCE**

All school psychology candidates are required to carry professional liability insurance through the university. Candidates are required to enroll in the plan at the time of each registration. The college/student professional liability insurance policy provides coverage while the candidate is attending Nova Southeastern University and while he or she is functioning in approved college activities. This policy does not provide coverage for non-approved or non-center-related activities. Candidates are encouraged to obtain their own professional liability insurance in addition to that provided by the university. Such coverage can be purchased through professional associations or obtained privately.
Practica Procedures

Clinics/agencies/school districts that participate in the practicum program are selected because of their program’s interest in the professional preparation of school psychologists. Moreover, they have staff members who are qualified and willing to accept the responsibility of sharing in the training of candidates. These staff members are not only professionally able, but sensitive to emerging concepts in the field of school psychology.

PRACTICUM PLACEMENT

School psychology candidates must abide by the differing guidelines for practicum placement as designated by the school district/agency that provides the experience. **Candidates will be required to complete a security clearance, which may include, but not be limited to, a background screening, fingerprinting, and drug testing.** Candidates are responsible for any costs associated with obtaining security clearance.

SUPERVISION

In addition to the supervision provided by the field-based supervisor (who may in some cases be the NSU faculty member) at the practicum site, candidates participate in a group case consultation course during each semester of practicum. This weekly, two (Foundations) or three-hour (School-Based and AA & I) session provides input to candidates regarding their practicum experiences, strengthens their professional identities as emerging health service providers, and serves to support their efficacy in the delivery of school psychological services. Candidates enrolled in practicum are monitored and observed on an ongoing basis by the university course instructor, who addresses individual candidates’ needs regarding both their placement and performance.

TRACKING OF PRACTICUM HOURS

Candidates will submit weekly practicum logs to their instructor for approval. Signed logs are submitted to the program office at the end of the semester. The field-based/faculty supervisor reviews the candidates logs monthly to verify completion of the activities listed and to ensure that candidates are completing the minimum required practicum hours. It is important to note that the time requirements listed for each practicum setting are minimum expectations. Some sites may require more hours, specific days of the week, evening hours, weekends, time when class is not in session or during holidays, specific course work, and other training requirements.

All practica include class consultation/seminar hours within the total hours required of the practica. Hours spent discussing student cases/clients are counted as group supervision. Hours spent discussing client care but not directly related to specific clients are considered Didactic Training/Seminars/Grand Rounds.
For School-based and AA & I practica, 50% of hours must be direct client contact. Other hours include: individual and group supervision, didactic training, support activities (e.g., scoring, interpreting, report writing, peer consultation (scoring of others' protocols), researching and planning interventions, attending school meetings, etc.).

CLIENT DIVERSITY IN PRACTICUM

The tri-county school districts surrounding the University; Miami-Dade, Broward, and Palm Beach counties, are among the most diverse in the United States. The demographic composition of Miami Dade County Public Schools is 66% Hispanic, 24% African American, 8% Caucasian, 1% Asian, and 1% Other. Broward County Public Schools is 40% African American, 29% Hispanic, 26% Caucasian, 3.5% Asian, and 1.5% Other. Finally, Palm Beach County Public Schools is 34% Caucasian, 29% Hispanic, 29% African American, 3% Asian, and 3% Other. The Summer Reading Explorers Program targets over 2,000 culturally and linguistically diverse young students from at-risk urban communities, many of whom are native Haitian-Creole and Spanish speakers. Moreover, this diversity is present at on-campus sites as well. The Mailman Segal Center (MSC), the on-campus birth through Pre-K4 setting is highly diverse, with 35% of the students identified as Caucasian, 21% African American, 35% Hispanic, 5% Asian, and 5% Multi-Racial. Approximately 25% of the students who attend the University School are from diverse backgrounds, while 80% of the children and families served through ChildNet represent a diverse culture.

PRACTICUM STUDENT EVALUATION

Each candidate will be evaluated to ensure that they maintain the minimum level of achievement (MLA) throughout the curriculum, as well as in the attainment of professional skills and dispositions, as outlined in the Field-Based Training Experiences Evaluation Form (Appendix C). It is the candidate’s responsibility to ensure that the field-based supervisor completes the evaluation form in the assessment system by the end of each semester.

Each practicum evaluation must be based in part on direct observation of the practicum student and his/her developing skills (either live or electronically).

PRACTICUM SITE EVALUATION

The candidate will complete the Practicum Site/Supervision Evaluation Form (Appendix D) at the completion of each semester of practicum as well as a course evaluation of the faculty member for the three hour seminar.

GRADING

Grades will be assigned by the university instructor with input from the field-based supervisor. In order to receive a grade for practicum, candidates must satisfactorily demonstrate all required competencies, complete all course requirements listed in the syllabus, including the minimum number of required practicum hours, and demonstrate satisfactory performance on the candidate evaluation form. The faculty instructor will assign grades according to the following system: A, A-, B+, B, B-, C+, C, C-, and F.
It is the practicum candidate’s responsibility to engage in and to document the required minimum number of hours each semester in order to obtain a passing grade. Candidates are encouraged to obtain as many hours above the minimum requirement as possible, in order to maximize their experience. Candidates who earn letter grades of C+, C, C-, or F will be required to repeat the practicum.

EXTENSION OF PRACTICUM EXPERIENCE

At times, candidates may choose to extend a practicum, either to gain additional experience or to follow specific clients. Candidates must obtain permission from their practicum supervisor and submit an agreement form to the Program Office prior to extending their training. The form to extend the practicum placement for the School-related Psychological Assessments and Clinical Interventions Clinic (SPACI) is the Psychology Services Center Request to Extend Clinical Experience Beyond Practicum (Appendix G), while the form for any other site is the Request to Extend Clinical Experience Beyond Practicum (Appendix F).

DUTIES AND RESPONSIBILITIES OF THE SCHOOL PSYCHOLOGY PRACTICUM COORDINATOR

1. The Practicum Coordinator will develop, maintain, and enhance collaborative field training relationships with a wide variety of internal (NSU-based) as well as community-based practicum sites. These may include public school districts, private schools, community mental health centers, county governments, hospitals, residential treatment facilities, and non-profit agencies, among others.

2. In close collaboration with the candidates, program director, core and associated faculty, and site supervisors, the Practicum Coordinator will facilitate matches appropriate to the candidate’s level of training with sites. These matches take into account the candidate’s interests and competency levels as well as the experiences available at each training site.

3. The Practicum Coordinator ensures that each practicum site provides training and supervision consistent with the program goals. Field-based training provides supervised experiences that will enhance the development of each candidate’s knowledge and skills as he or she develops a professional identity as a health service provider. Field-based experiences were designed based upon the standards set forth by the American Psychological Association (APA), the National Association of School Psychologists (NASP), and the Florida Department of Education (FLDOE).

4. The Practicum Coordinator ensures that field-based practicum experiences are thoroughly integrated with the curriculum. This integration is accomplished via weekly faculty meetings where challenges in the integration between didactic and field based experiences are addressed regularly. More specifically, accompanying case consultation classes are led by psychologists so that candidates can discuss their practicum experiences and relate these experiences to didactic training. These combined programmatic efforts ensure that practicum assignments are sequential, cumulative, and graded in complexity so as to prepare candidates...
effectively for further clinical training and practice in the specialty area of school psychology.

5. The Practicum Coordinator ensures that each of the three years’ of practicum placement training assignments are carefully structured so that the candidate develops progressively more depth and breadth in attainment of clinical competency. Practicum assignments build from observation, shadowing, screening and progress monitoring, as well as educational/behavioral consultation in the first year. In the second year, targeted screening experience leads to comprehensive assessment and psychotherapeutic interventions in school settings or with school-aged clients. During the third year, candidates provide assessment, consultation, and intervention in challenging clinical settings involving children, adolescents, and adults with educationally-related problems/issues.

6. The Practicum Coordinator reviews the progress of each candidate in each practicum site via regular contacts with the practicum site supervisors, faculty consultants, and the School Psychology Site Manager. End-of-semester evaluations are collected from each practicum site supervisor and constitute a significant contribution to the candidate’s grade in the practicum consultation class, as well as a reliable indicator of the candidate’s acquisition of key competencies.

7. The Practicum Coordinator, in consultation with the NSU School Psychology Site Manager, the Site Supervisor, and the Faculty Consultant, will identify problems in candidate progress and will recommend remediation strategies to the Program Director, as specified in the Policy and Procedures Handbook for the Doctoral Program in School Psychology.

8. The Practicum Coordinator is responsible for ensuring that candidates are placed in organized practicum settings that are clearly committed to the training and supervision of candidates and that utilize adequate numbers of appropriately-credentialed professionals, while providing a wide range of training and educational experiences via the applications of empirically supported intervention procedures. Candidates learn to diagnose/identify problems through psychological assessment and measurement procedures and consultation, to develop coherent case formulations, and to implement a wide variety of intervention strategies. Included in this process is training in empirically supported assessment, consultation, and intervention procedures, as well as training in understanding and attending to the importance of common factors.

9. The Practicum Coordinator, in consultation with the NSU School Psychology Site Manager and the Site Supervisor, monitors practicum site performance as described above via: 1) candidates’ verbal and written accounts throughout the semester, 2) candidates’ completion of a formal written site assessment instrument at the conclusion of the semester, and 3) periodic site visits conducted by the Practicum Coordinator or designee.
DUTIES AND RESPONSIBILITIES OF THE PRACTICUM STUDENT

The school psychology candidate enrolled in practicum is expected to act in a professional manner at all times. He or she is expected to fulfill the following responsibilities:

1. Complete the Field-Based Supervisor Information Form (Appendix B) (as appropriate) with the field-based supervisor and submit to the program office.

2. Schedule and perform required field activities at the facility as directed by the field-based supervisor.

3. Demonstrate competencies associated with the areas described on the evaluation forms.

4. Maintain a detailed electronic log of all practicum experiences and tasks to be reviewed and signed by the field-based supervisor. Submit approved summary records to the university faculty member as directed. Copies should be kept of all personal documents submitted.

5. Attend at least 45 minutes of individual supervision with the field-based supervisor per week or its equivalent in groups.

6. Read assigned textbook chapters and professional journal articles (as applicable).

7. Confer with the field-based supervisor and NSU faculty member when necessary. If a problem arises at the site that cannot be resolved, discuss this problem with the NSU faculty member and/or program director.

8. Continuously work to improve his or her performance in response to constructive feedback provided by the field-based supervisor and/or university faculty member.

9. Candidates evaluate all practicum sites and supervisors each semester to determine the adequacy of supervision, their adherence to program policies, and the appropriateness of the site in meeting the program’s training goals and objectives by completing the Practicum Site/Supervision Evaluation Form (Appendix D) each semester.

10. Audio or videotape consultation, assessment, and/or counseling sessions if facility rules and parents/guardians/adult clients allow, with proper informed consent (Appendix K).

11. Abide by the ethical principles of the American Psychological Association (APA); the National Association of School Psychologists (NASP); the State of Florida statutes for Licensed Psychologists (Title XXXII, Chapter 490); the Florida State Board of Education rule 6B-1.001, FAC; regulations of the Family Educational Rights and Privacy Act (FERPA) when applicable; as well as all district and individual school policies and procedures as applicable. Likewise, as a representative of NSU, the candidate has an obligation to perform at the highest level of functioning and to demonstrate professional behavior as specified in the Doctoral Program in School Psychology Policies and Procedures Handbook at all times.
12. Become familiar with and abide by all state and federal regulations governing the practice of psychology (e.g., abuse reporting requirements; rules governing breaking confidentiality).

13. Engage in at minimum the required hours for practicum and supervision.

14. Must have completed HIPAA training offered through the College of Psychology prior to starting their first semester in the program, as well as any other additional training required by specific practicum sites.

**DUTIES AND RESPONSIBILITIES OF THE FIELD-BASED SUPERVISOR**

The field-based supervisor, in collaboration with the university faculty member, has the responsibility of monitoring and evaluating student performance in the practicum experience for candidates in the doctoral program. He or she is expected to work continuously to expand and to improve the candidate’s clinical skills by providing a range of experiences that foster growth of specified competencies. Therefore, the field-based supervisor has the following duties and responsibilities:

1. Acquaint the candidate with the policies and procedures of the agency.

2. Provide opportunities for the candidate to complete required practicum hours and activities to attain the program goals and objectives.

3. Provide a minimum of 45 minutes of face-to-face supervision weekly (or the equivalent in a group format).

4. Assist the candidate in relating applied experiences to theoretical constructs learned in coursework.

5. Provide candidate with feedback regarding their strengths as well as areas for improvement. When necessary, report conflicts/concerns to the university faculty member and program director.

6. Complete the *Field-Based Training Experiences Evaluation Form* (Appendix C) which must be based on direct observation (live or electronically) of the candidate, and meet with the candidate to discuss whether he or she has met the minimum required competencies at the end of each semester.

7. Hold a valid license as a psychologist in the State of Florida or be appropriately credentialed for the site with at least one year of employment in the current school district/agency/clinic.
DUTIES AND RESPONSIBILITIES OF THE SITE MANAGER

The site manager’s promotion of the practicum program plays a vital role in the success of the candidate’s practicum experience. The site manager has the following duties and responsibilities:

1. If applicable, contact representatives from current NSU practicum sites to reevaluate continued interest in the program.

2. Send letters, send e-mails, and make telephone calls to school psychological services/clinic/agency personnel as necessary.

3. Collect practicum applications (if applicable) and complete requests for placement for each school district/clinic/agency and notify candidates of their placements.

4. Meet with candidates to ensure appropriate placements in practicum.

5. Keep faculty abreast of difficulties that candidates experience during the course of their practicum placement.

DUTIES AND RESPONSIBILITIES OF THE NSU FACULTY MEMBER

The NSU faculty member serves as a liaison between the university and the practicum site. He or she has the primary responsibility of helping to structure a beneficial learning experience throughout the practicum. In addition, when appropriate, the faculty member may:

1. Make a telephone contact and/or site visit with each candidate’s field-based supervisor as needed.

2. Follow the activities of the candidate enrolled in practicum closely and provide opportunities for the candidate to relate and to discuss his/her experiences/cases at the practicum site and help candidates formulate appropriate case conceptualizations and interventions.

3. As appropriate and relevant, discuss with the candidate ethical standards for professional behavior and legal issues pertaining to school psychologists and the students, families, and schools/agencies that they serve.

4. Monitor assessment and/or intervention skills through role-playing, audiotape/videotape analysis, direct observation (when feasible), and written reports.

5. Review the candidate’s electronic log on an ongoing basis and help the candidate to evaluate his or her experiences and to recognize areas of growth and areas where further development is needed.
6. Either the Practicum Coordinator or the NSU Faculty Member will visit and complete the Rubric for Practicum Site Visit (Appendix E) at least annually and engage in regular communication with the site supervisor.

7. Provide a weekly, three-hour group case consultation course.
Internship Procedures

ELIGIBILITY FOR INTERNSHIP

Candidate eligibility for the doctoral internship application process is determined prior to the start of the fall application season, the year preceding the potential participation. Faculty and/or administrators of the doctoral program in school psychology will approve the candidate’s readiness for internship during annual review. This review includes performance in applied settings, grades, on-going work on the Directed Study, professional behavior, completion of the annual Student Survey, and attainment of minimum levels of achievement (MLA) in the completion of curricular requirements. Satisfactory completion of all coursework, along with final approval of the capstone Directed Study, is required in order to begin the doctoral psychology internship. Moreover, in order to be deemed eligible to begin the doctoral internship, students must meet the 80% MLA and achieve an overall grade point average (GPA) of at least 3.0. Candidates who do not meet the minimum requirements will be advised and remediated as appropriate prior to beginning internship.

It is the candidate’s responsibility to investigate and to apply for multiple internship opportunities. Prior to initiating the application process, candidates must be deemed eligible to apply. The Program Office will verify the candidate’s eligibility to accept and subsequently, to begin, an internship based upon the Annual Review process. Because of the competitive nature of obtaining an internship, each candidate is required to apply to multiple settings as advised by faculty and administrators.

To accept an internship placement, a candidate must be in good academic standing and have successfully completed all academic requirements as described above. If the candidate has had any legal involvement of any type, even if the charge was expunged from his/her record, it must be acknowledged on the APPIC application. Candidates should contact the Director of the School Psychology Doctoral Program to discuss further if this is a concern in order to be sufficiently prepared to discuss on the application and during the interview process. Ongoing disclosure is required of all candidates enrolled in any academic program in the Center.

SELECTION OF INTERNSHIP SITES

School psychology candidates must complete a supervised school psychology doctoral internship. Doctoral interns engage in a 2000-hour, culminating professional practice experience under the supervision of a licensed psychologist. The 2000-hour internship may occur full-time over one year, or half-time over two consecutive years.

Candidates seeking initial certification as a school psychologist must complete 1200 hours in a PK-12 school setting in order to be considered a Florida Department of Education (DOE) “completer.” All candidates are required to complete at least 600 internship hours in a PK-12 setting prior to degree conferral. The school-based hours may be obtained during the completion of the 2000-hour doctoral internship. Alternatively, a candidate may complete an elective internship (600 or 1200 hours) in school psychology within an approved PK-12 school
setting during their fourth year of study, prior to applying for a doctoral-level internship. Supervision must be provided by a psychologist holding the appropriate state psychology credential for practice in the internship setting.

**Licensure and certification requirements vary from state to state. Candidates are advised to consult relevant state licensure and certification requirements when researching internship sites.**

Application to an APA-approved internship should begin with review of the Association of Psychology Postdoctoral and Internship Centers (APPIC) Directory, which can be found online at http://www.appic.org/directory/. In addition, a list of APA-approved doctoral internship sites is published annually in the *American Psychologist*. More specifically, the Joint Committee on Internships for the APA Council of Directors of School Psychology Programs (CDSPP), Division 16 of APA, and the National Association of School Psychologists (NASP) publish an annual Directory of Internships for Doctoral Students in School Psychology that can be found at http://www.ed.psu.edu/educ/epcse/school-psychology/internship-director.

Internship applications for the APPIC match are typically submitted between November 1st and December 15th of the year prior to the start of internship. Selected applicants are invited for interview during the months of December and January. Following the interview process, applicants submit a rank ordered list of the sites where they interviewed and are notified whether they have been matched to a site on “Match Day,” which occurs in February each year.

If candidates are not matched through the APPIC process, they may participate in the second phase of the match and/or pursue a non-APPIC approved internship. This internship option should be a 12-month, 2000-hour experience with supervision by a licensed psychologist. Application to all doctoral internship sites must be discussed with the candidate’s faculty advisor and approved by the Program Director. If the candidate is pursuing an internship outside of APPIC, he/she should work closely with his/her faculty mentor in selecting the internship sites to which he/she will apply. However, it is ultimately the candidate’s responsibility to research sites and to develop a strong application in order to obtain the internship placement. Once a final list of application sites is determined by the candidate with the faculty mentor, he/she should submit the list to the Program Director for final approval.

Doctoral candidates considering the completion of an internship within a public school system in Florida are encouraged to utilize the resources available through the Florida Association of School Psychologists (FASP). This information is located on the Training and Credentialing portion of the FASP website: http://fasp.org/PDF_Files/Training_Credentialing/FASP_Intership_Guide.pdf.

School districts located within the state of Florida are strongly encouraged to follow the FASP *Internship Standardization Process*. The guidelines surrounding this process are posted on the FASP website annually. In summary, candidates submit their application materials in January and complete interviews in late January and throughout the month of February. Notification of interns who have been selected by a school district typically occurs on the first Monday in March referred to as “Call Day.”
Council of Directors of School Psychology Programs (CDSPP) Internship Guidelines

In circumstances where either an APA-accredited or an APPIC-listed internship is not obtained, the following criteria, modified based upon the Council of Directors of School Psychology Programs (CDSPP) Doctoral Level Internship Guidelines, should be utilized in determining the appropriateness of the setting. Prior to application to a non-accredited site, the Program Director must approve application.

The doctoral internship is an important culminating professional practice experience in doctoral-level health service school psychology. The following includes guidelines that characterize high-quality doctoral school psychology internship experiences, consistent with American Psychological Association (APA) Standards of Accreditation for Health Service Psychology (SOA) and the School Psychology Specialty.

Although these guidelines set forth basic quality standards, specific internship requirements for licensure and certification are set at the state level and do vary by state and jurisdiction. Therefore, graduate students should consult relevant state licensure and certification requirements when considering the suitability of a particular internship.

CDSPP is an organization of doctoral level school psychology programs that is committed to training school psychologists as health service psychologists. CDSPP is not an official accrediting body and does not evaluate, approve, or accredit internships or training programs. CDSPP guidelines may be useful for prospective interns who must evaluate the quality of school psychology doctoral internship, and for doctoral training programs that must make program development and internship approval decisions. These guidelines may also be used by organizations authorized to approve or accredit internships or training programs. Doctoral training programs and internship sites that are interested in accreditation by the American Psychological Association should refer to the SOA published by the APA Office of Program Consultation and Accreditation.

In the absence of special circumstances, a doctoral internship program in school psychology that meets these guidelines will also be considered as meeting the Guidelines for Defining an Internship or Organized Health Service Training Program in Psychology developed by the National Register of Health Service Providers in Psychology to identify an acceptable internship, which is one of several requirements for credentialing by The National Register of Health Service Providers in Psychology.

1. A school psychology doctoral internship is an organized training program designed to provide an intern with a planned sequence of training experiences that will develop the intern’s professional wide competencies in health service psychology and the specialty of school psychology.

The internship is the culminating (i.e., completed after a programmed sequence of coursework, practica, and field experiences), supervised training experience prior to the granting of a degree by a doctoral program. Consistent with the definition of health service psychology (i.e., the integration of psychological science and practice in order to facilitate
human development and functioning), the internship consists of a range of activities promoting the development of the following profession-wide competencies:

- Research;
- Ethical and legal standards;
- Individual and cultural diversity
- Professional values, attitudes, and behaviors;
- Communication and interpersonal skills;
- Assessment;
- Intervention;
- Supervision;
- Consultation and interprofessional/interdisciplinary skills.

2. The intern, whether full-time or part-time, spends at least 25% of his or her time in providing direct (face-to-face) psychological services to clients, patients or consultees, such as teachers or other mental health service providers, which translates to a minimum of 375 hours out of 1500 doctoral internship hours. The intern engages in research activity which includes the evaluation of services delivered and the effectiveness of the intern’s own training.

3. The internship program must provide prospective interns with a dated written statement, brochure, or website that clearly states the aims, activities, and any requirements of the doctoral internship program, the supervision and supplemental training activities (e.g., learning experiences) provided, and clear expectations for the quality of intern’s work. The internship program, doctoral program, and intern must jointly approve in writing the goals and content of the internship, including clearly stated expectations for the nature of experiences offered by the internship program, the quantity and quality of the work, intern salary, benefits, reimbursable travel, holidays, and other relevant internship policies.

Internship program due process procedures are made available to interns prior to the beginning of the training period. If due process procedures are initiated as a result of intern behaviors, intern activities, or internship conditions, the supervisor of the internship program will notify the intern’s doctoral program.

4. Interns will minimally receive a formal, written evaluation at the end of the doctoral program’s semester, trimester, or quarter course grading period. The internship program and doctoral program will agree in advance upon the format of the internship evaluation, which should in part be based on direct observation. The evaluated areas will be consistent with the doctoral program’s aims and address intern development of profession-wide competencies.

Although the internship supervisor evaluates student performance during the internship year, the doctoral program is ultimately responsible for the determination of the student’s readiness for graduation and entrance into the profession. Therefore, communication between doctoral programs and internship programs is of critical importance to the overall development of competent health service psychologists.
5. Full-time internships are completed in no less than 10 months; part-time internships may extend to no more than 24 months. The internship includes a minimum of 1,500 hours in activities described above. Interns should consult relevant credentialing (e.g., state licensure and certification) requirements to determine the number of internship hours required for licensure and other desired credentials. In addition, the National Association of School Psychologists (NASP) has established requirements for internship (e.g., completion of at least 600 hours in a school setting). For more information, consult the relevant NASP standards and credentialing documents.

6. The doctoral internship program issues to the intern written documentation (e.g., a certificate or letter) reflecting successful completion of a doctoral level internship in health service psychology.

7. The internship program employs a clearly designated doctoral-level psychologist, who: (a) is currently licensed by the state regulatory board of psychology to practice at the independent level, and (b) is responsible for the integrity and quality of the internship program. The internship program has at least two psychologists on staff available as supervisors for the intern. The intern’s primary supervisor must be actively licensed as a psychologist by the state regulatory board of psychology. Internship programs such as school districts that have the capacity for only one staff psychologist may meet the spirit of this criterion (breadth of training experience) by entering into formal internship agreements with other entities, such as other school districts, clinics, or university doctoral programs.

8. The full-time internship includes at least two hours per week of regularly scheduled individual supervision by a doctoral level psychologist licensed for practice at the independent level. The primary supervisor must directly observe the intern with the specific intent of evaluating the intern’s clinical deportment and skills in psychological service delivery, and providing formative and summative feedback to the intern and university program. An internship program that does not permit live observation or audio-video recording by policy should not be approved under these guidelines.

9. In addition to the individual supervision (as described in #8 above), the intern spends at least two additional hours per week in scheduled group or individual supervision conducted by an appropriately credentialed health service provider (e.g., doctoral level psychologist, credentialed school psychologist, etc.).

   The intern has regularly scheduled, supervised, and documented training activities with other doctoral psychology interns such as professional development/in-service training; case conferences involving a case in which an intern is actively involved; seminars dealing with professional issues; or observing delivery of health, educational, and/or child/adolescent services. These activities may be in conjunction with appropriately credentialed professionals other than school psychologists.

10. The internship program has two or more interns engaged in training at the same time. However, agencies having the capacity for only one intern may meet the spirit of this criterion (i.e., the socialization of doctoral-level psychology interns) by having regularly
scheduled and documented training activities with psychology interns at other sites in the immediate geographic area or, when internship sites are at a significant distance from each other, by making arrangements for regularly scheduled meetings of interns for several hours on at least a monthly basis.

11. Internship supervision may be provided through synchronous audio and video format where the supervisor is not in the same physical facility as the intern. Supervision through electronic means may not account for more than one hour (50%) of the minimum required two weekly hours of individual supervision (as described in #8 above), and two hours (50%) of the minimum required four total weekly hours of supervision (as described in #8 and #9 above). The use of telesupervision should be consistent with the program’s overall model and philosophy of training, with assurance that relationships between supervisors and trainees are established prior to engaging in telesupervision. Programs utilizing any form of telesupervision have a formal policy that includes procedures to address issues of non-scheduled consultation, crisis coverage, and handling of privacy and confidentiality. These policies and procedures are established in advance and shared among the training program, the internship site, and the intern(s). Internships using telesupervision adhere to best practices and ethical, legal, and professional guidelines.

12. Reports and documents prepared by the doctoral intern for consumers, other agency or school personnel, or other relevant publics are co-signed by the licensed psychologist supervisor for the intern.

13. The trainee has a title such as “intern,” “resident,” or other designation of trainee status regardless of pay grade or temporary licensure status, etc. Interns who hold other relevant credentials (e.g., National Certifies School Psychologist, NCSP) may include this information as long as it is accompanied by recognition of his or her doctoral intern status.

Obtaining an internship and ensuring that the internship meets licensure/certification requirements for the state(s) in which the candidate wishes to obtain credentialing is the candidate's responsibility.

INTERNSHIP PLACEMENT

Application for internship in school psychology is a competitive process and candidates are required to apply to at least 15 sites. Candidates are strongly encouraged to attend all meetings led by faculty to prepare for the process, read the Doctoral Program in School Psychology Internship Application Guidelines document, and read the book entitled Internships in Psychology: The APAGS Workbook for Writing Successful Applications and Finding the Right Fit (Williams-Nickelson, Prinstein, & Keilin, 2012) to assist in this process.

Internship sites typically require candidates to complete a security clearance, which may include, but not be limited to, a background screening and fingerprinting. Candidates are responsible for any costs associated with obtaining security clearance.
It is important to note that candidates will participate in a university-based consultation course (in addition to the site-based supervision) during the completion of the doctoral internship.

**SUMMARY RECORD**

Candidates are required to keep a detailed internship summary record of all assessment, intervention, consultation, and supervision activities at the initiation of their internship. Candidates are to utilize an online system as discussed previously to maintain a comprehensive log of these experiences. Entries should be made on a continuous basis to ensure accurate recording of experiences. Records are to be kept in a digital format and submitted to the university instructor monthly. Candidates will be provided feedback regarding the adequacy of the entries in the document in terms of comprehensiveness of experiences and practice opportunities. In addition, a hard copy of the completed record, signed by the field-based supervisor, is to be submitted to the university instructor at the conclusion of the internship experience. The Post Internship Survey (Appendix I).

**SITE VISITS**

Face-to-face or telephone meetings between the university instructor, field-based supervisor, and intern will occur as appropriate for the purpose of discussing the intern’s progress. More frequent site visits, phone calls, and/or email correspondence will be scheduled for candidates in the event of specific concerns. In those instances where the internship is outside the state of Florida, telephone contacts, email, and/or U.S. mail may be substituted for face-to-face meetings.

**LICENSURE AND CERTIFICATION**

School psychologists are certified in 43 of the 50 states by the Department of Education (DOE) as a professional educator to provide school psychological services in public, private, or charter schools. Certification in school psychology can occur at either the specialist or doctoral level. Licensure requirements in school psychology vary from state-to-state. Florida is one of approximately 10 states that credentials school psychologists for independent practice at the specialist level. Licensure requirements include three years of supervised experience as a school psychologist and a passing score of 165 on the School Psychology specialty area exam on the Praxis II National School Psychology Specialty Examination. School psychologists holding the doctoral degree in psychology are eligible for the general psychology licensure available in every state. Requirements for this license include a doctoral degree in psychology, 2 years of supervised experience as a psychologist (half of which may be satisfied by the completion of a doctoral internship), a passing score on the national Examination for Professional Practice in Psychology (EPPP), and completion of the specific requirements designated within each state. The following links provide detailed information regarding the specific requirements of licensure and certification in Florida:
Steps to certification for Florida educators:
http://www.fldoe.org/edcert/pathways.asp

Specialization requirements for Certification in School Psychology:
http://www.fldoe.org/edcert/rules/6A-4-0311.asp

Information regarding the National Certification Program for School Psychologists (NCSP):

For information regarding general psychology licensure:
http://www.doh.state.fl.us/mqa/psychology/psy_lic-ppy.html
http://www.asppb.net/i4a/pages/index.cfm?pageid=3479

The reader is also referred to the Doctoral Program in School Psychology Internship Application Guidelines, which provides a comprehensive overview of issues to consider in the areas of licensure and certification.

GRADING

Grades will be assigned on a Pass/Fail basis by the university instructor with input from the field-based supervisor. Grades will not be posted until all relevant paperwork and evaluations have been submitted to the university instructor.

A school psychology candidate who falls below the minimum acceptable levels as described above at any point during the internship experience is required to work with the field-based supervisor and university instructor to develop a written remediation plan addressing areas of weakness. Any candidate who is dismissed, resigns from, or fails internship must complete an additional internship year and follow an individualized remediation plan developed by the field-based supervisor and university instructor and/or core university faculty who oversee internship in order to receive his or her degree.
APPENDICES
DOCUMENTATION OF PRACTICUM HOURS

- It is very important that all practicum hours are carefully documented.

- Review your hours with your supervisor on a regular basis.

- When calculating practicum hours, you should do your best to provide an exact number of hours accumulated and number of clients seen though there will be times when your “best estimate: will be called for.

- Each activity should only be recorded in one section. You may have some experiences that could potentially fall under more than one category, but you must select the one category that you feel best captures the experience.

ASSESSMENT AND INTERVENTION

I. Direct Service
This refers to face-to-face intervention and assessment experiences. Candidates should only count the time spent in the presence of their client(s) in this category. These types of activities fall under “Support Activities” and should be recorded in their appropriate categories under this heading.

a. Individual Therapy: Face-to-face time with clients or patients engaged in psychosocial treatment. This may include relationship issues (where significant players are not present), treatment of disorders (e.g., mood disorders such as depression, substance abuse disorders such as alcohol abuse, anxiety disorders such as agoraphobia, V-codes, etc.). The key to this category is that it reflects time spent with an individual in the delivery of some form of psychosocial treatment. A 45 to 50 minute individual therapy session counts as one (1) hour of face-to-face individual therapy. Teaching a basic skill or academic or socio-emotional intervention to an individual student can be documented here.

b. Career Counseling: May involve discussing the results of assessment (e.g., Strong-Campbell Interest Inventory) as they relate to various career issues/decisions. Also acceptable is discussion of career plans and means to achieve career-related goals (e.g., schooling, financial concerns related to developing a career or switching careers).

c. Group Therapy: Simply the time spent delivering group therapy – acting as a group therapist or co-therapist. Most groups run about 90 minutes; therefore, count a 90-minute group session as 1.5 hours of face-to-face group therapy. Teaching a basic skill or academic or socio-emotional intervention to a group of students could be documented here.

*Class mindfulness training at University School goes here if the students learn, practice, and receive feedback on the skill.
d. **Family Therapy:** This is distinguished by the presence of at least two (2) individuals who are married or a parent (or legal guardian) and child dealing with family relationship issues. This sub-category may also include unmarried couples who have offspring or adopted/foster children. Legally defined marriage or legally defined guardianship and/or blood relations characterize this category.

e. **Couples Therapy:** This sub-category is most appropriately used to represent time spent in therapy with couples (typically unmarried dyads) dealing with issues relevant to the couple’s relationship.

II. **School Counseling Interventions**

A general recommendation is that when the intervention takes place in the school setting and is for the management of school-related problems, the intervention should be listed under this school counseling subheading. However, candidates may wish to categorize a service differently depending upon what they want to emphasize. Experiences can only be counted once.

a. **School Consultation:** This involves work with schools on a variety of issues that may represent the results of formal child assessment (including behavioral observations, IQ testing, achievement testing, ADHD assessment, etc.) and subsequent treatment recommendations or indicated changes in teaching strategy. Often parents of guardian(s) are present when recommendations and diagnoses are presented along with the special education teacher, school principal, and classroom teacher (e.g., an IEP meeting). Hours spent while in a consulting role on school issues with school personnel (e.g., teachers) or parents belong here. The client (individual, family, or organization) or agent of the client (e.g., parent or teacher) must be present in order to log as consultation. If the consultation is conducted with professionals regarding coordination of care (e.g., speech and language therapist or occupational therapist) WITHOUT the client/patient or agent present, it should be counted as a support activity (per the APPI directions). This distinction is important because direct service is only face-to-face intervention and assessment experiences in the presence of the client.

b. **School (direct intervention):** This category is reserved for trainees who have delivered psychosocial/behavioral interventions within a school context or even in the student’s home if they are directly related to the management of school-related problems.

III. **Other Psychological Interventions**

a. **Sports Psychology/Performance Enhancement:** Reserved for interventions related to psychological functioning within a specific sport or performance domain. The goal of interventions is to increase performance.
b. **Medical/Health Related:** A subcategory devoted to health psychology. May include biofeedback, treatment compliance issues, lifestyle issues, genetic counseling, stress-management/relaxation exercises, etc.

c. **Intake/Structured Interview:** Includes time spent in clinical interviews (open, semi-structured, or structured) where diagnostic impressions and the presenting problem or chief complaint are identified. Family, work, substance use, health, social and developmental history are part of this interview. Also, demographic information (e.g., marital status, number of children, ethnicity, etc.), past/current treatment history and outcomes, medication use, level of functioning, social support, life stressors, etc. are all important areas to include in most interviews. The preparation/writing of the intake report should be included in the Clinical Writing/Progress Notes subcategory.

d. **Substance Abuse Intervention:** Simply the hours spent delivering psychosocial interventions relating to substance abuse treatment. This can include a number of intervention areas such as health concerns/detox concerns, problem solving, situation projection and role-play, identification of triggers, reduction of craving, developing a healthy social support network, referral to legal experts, adjustment to a substance-free lifestyle/relationship, etc.

e. **Milieu Therapy:** Typically refers to inpatient settings where patients are receiving a form of therapy through the active participation of unit staff and active participation of patients in unit activities.

f. **Treatment Planning with Client:** May include time spent in developing a formal contract for therapy, discussion of treatment options, progress assessment, etc. This activity occurs in the initial stage of treatment (sometimes the first session but usually in session two or three), and it may be revisited as progress is assessed and course of treatment is evaluated.

g. **Consultation:** Can be characterized as a helping, problem-solving process involving a help giver (the consultant), a help seeker (the consultee), and another (the client, organization, etc.). This voluntary, triadic relationship involves mutual involvement on the part of both the consultant and consultee in an attempt to solve the current work-related problem in a way that it not only stays solved, but that future problems may be avoided and/or more efficiently handled (prevention). (Parson, 1999, p.13). In many practicum settings, consultation may take place between the consultant and the candidate with the aim of improving service to a client, but the client may or may not be present for the consultation. Examples of individuals one may receive consultation from are other mental health professionals, medical staff (including psychiatrists), family members, peers, correction agents, etc. Providing information regarding intervention and/or child progress to parents also falls under this category.

*Time spent discussion a case with your Supervisor is almost never counted as “Consultation” but rather is “Supervision.”*
NOTE: Distinction from supervision – Typically related to consultation is that the consultee has the power or the decision-making ability to decide not to use the consultant’s feedback, suggestions, or recommendations. A consultant does not usually have evaluative power regarding the student, whereas a supervisor does have evaluative obligations.

IV. Other Psychological Experiences with Students or Organizations

a. Supervision of Other Students: A sub-category reserved for students who are enrolled in or have completed instruction in supervision and are being supervised by a doctoral-level supervisor. These individuals may provide supervision to M.S., Psy.S., or Psy.D. practicum students and count their time spent in this activity here.

b. Program Development/Outreach Programming: In general, this includes any time spent in the development and/or delivery of community- or agency-based treatment programs (e.g., developing a caregiver supportive treatment, sexual abstinence programs, parenting programs, programs directed toward the reduction of domestic violence, and community outreach including any type of community psychoeducation). Planning an academic or social skills intervention for a larger group, class, or school could be documented here.

c. Outcome Assessment of Programs or Projects: Typically a research-oriented activity involving some type of pre/post-assessment (or time series design) and an analysis of change or effectiveness within the context of an existing psychosocial program.

d. System Intervention/Organizational Consultation/Performance Improvement: This sub-category is a little vague; however, it involves time spent in clinical activities relevant to professional organizations (where the organization is the client). In this case, the school could be the client. For example, if an organization contracts to have a trainee assess potential job applicants or employees being considered for advancement or reorganization. Another example is attending school meetings for the purposes of school-wide planning (e.g., crisis team planning, etc.).

e. Other: A sub-category created to allow for clinical experience related to Assessment and Intervention that does not have a sub-category already identified in this domain. Observations of classrooms and children for the purpose of understanding disabilities and services should be recorded here.

V. Psychological Assessment Experience
A psychological instrument used to evaluate a client. Various types of assessments are intelligence assessments such as the WAIS-III; personality assessments such as the MMPI-2; career assessments such as the Strong Interest Inventory; structured assessments such as the SCID-I; or AODA assessments such as the ASI, etc. Make sure to record the specific assessments administered and the number of each administered. Also be sure to record if you scored the instrument, if you interpreted the instrument, if you incorporated it into a
report, as well as the time spent giving feedback to a client on their assessment scores. There are separate sections for each activity on the hours documentation sheet. This category includes any assessment experience, excluding practice administrations (for example, you should NOT count administrations that you gave to classmates in an assessment class).

a. **Psychodynamic Test Administration:** Any time spent administering a psychodynamic instrument (e.g., MMPI, MCMI, CPI, PAI, SCL-90-R, HRSD, BDI-II, STAI, Rorschach, etc.). Technically, the SCL-90-R, BDI-II, STAI, and HRSD are symptom inventories, not diagnostic instruments; however, they are traditionally included as part of a diagnostic interview and it can be argued that the time spent delivering these instruments may be included here. Using oral, written, or projective methods as a diagnostic procedure. Include symptom assessment, projectives, personality, objective measures, achievement, intelligence, and career assessment. Also includes providing feedback to clients/patients. In PSYKey, there is a separate category called “Assessment Feedback.”

b. **Neuropsychological Assessment:** Any time spent administering neuropsychological assessments – may include IQ, TPT, Trails, NCSE, Finger-Tapping, various tests of aphasia or apraxia, personality testing, MicroCog, NEPSY, Bailey, Grip Strength, Fingertip Writing, Visual Field confrontation, observational assessment, assessment of premorbid functioning, etc. An assessment of how a client’s brain structurally functions. Include intellectual assessment in this category only when it was administered in the context of neuropsychological assessment involving evaluation of multiple cognitive, sensory, and motor functions. Only include intelligence testing here if the test was administered in the context of a neuropsychological assessment.

c. **Other:** Conducting observation as part of testing or as an assessment method.

**SUPPORT ACTIVITIES**

Time spent gathering information about the client, but not in the actual presence of the client. For example, time spent on chart review, writing process notes, consulting with other professionals about cases, video/audio tape review, time spent planning interventions, interpreting assessments, report writing, etc. In addition, it includes hours spent at a practicum setting in didactic training (e.g., grand rounds, seminars).

I. **Assessment Report Writing**
   Writing reports on administered assessments.

II. **Case Conferences**
   Bring together key parties in order to mutually agree upon goals and strategies to achieve them.
III. **Case Management**
A collaborative process of assessment, care planning, facilitation, and advocacy for options and services to meet an individual’s mental health needs.

IV. **Chart Review**
Reviewing patient or client charts. Review child records in a school.

V. **Clinical Writing/Progress Notes**
Writing treatment progress notes, or other clinical writing. Writing up skills group summaries.

VI. **Coordinate Community Resources**
Assisting a client in locating and/or securing community resources.

VII. **Grand Rounds**
Presenting the medical problems and treatment of a particular patient to an audience.

VIII. **Observation**
Observing other trained individuals perform therapeutic activities.

IX. **Phone Session**
Psychotherapy conducted over the phone.

X. **Professional Consultation**
Consulting with another professional regarding a case or clients.

XI. **Psychoeducational Group/Workshop**
Group that focuses on educating clients about their disorders and ways of coping.

XII. **Psychological Assessment Scoring/Interpretation**
Scoring and/or interpreting psychological assessments.

XIII. **Seminars/Didactic Training**
Any training involving seminars or lectures. “Didactic” means “intended to teach.” This category is activity aimed at teaching. This includes practicum class time not designated to reviewing specific cases.

XIV. **Video-Audio-Digital Recording Review**
Reviewing video or audio recordings.

XV. **Support-Other**
Classroom support at Baudhuin when not working directly with a child/group of children in teaching/practicing specific skills.
SUPERVISION

Supervision is divided into one-on-one, group, and peer supervision/consultation. Supervision provided to less advanced students is considered “Supervision of Other Students” and does not fall into the supervision category. Group supervision is considered to be actual hours of group focus on specific cases. Practicum classes often incorporate both didactic and experiential components in the course activity. While the didactic portion is excellent training, it should not be recorded as a supervision activity; it should instead be counted as a support activity. This may necessitate breaking the hours spent in a practicum course into case conference, supervision, and didactic activities by actual course hours. Time spent presenting a case should be recorded as “Group Supervision” if your supervisor is present. But if you present on a topic using examples of cases, it is a didactic activity. Similarly, Grand Rounds that consists of in-service education on specific topics would NOT be considered supervision for the purposes of documenting practicum hours, but would be considered a support activity. All time spent discussing cases with your supervisor falls under the appropriate supervision category (i.e., 1:1 or group supervision, etc.).

I. Supervision 1:1
Regularly scheduled face-to-face individual supervision with specific intent of overseeing the psychological services rendered by the student. “Supervision is an intervention provided by a more senior member of the profession to a more junior member or members of that same profession. This relationship is evaluative, extends over time, and has the simultaneous purposes of enhancing the professional functioning of the more junior person(s), monitoring the quality of professional services offered to the client(s) she/he/they see(s), and serving as a gatekeeper of those who are to enter the profession” (Bernard & Goodyear, 1998). The ability to evaluate, to assume responsibility for client care, and to hold accountability highlight the significant differences between supervision and consultation. The supervisor has this, and the consultant does not.

II. Peer Supervision
May be regularly scheduled face-to-face supervision with peers (i.e. doctoral-level practicum students or masters-level practicum students) with specific intent of overseeing the psychological services rendered by the student. Students should not confuse “Peer Supervision” with “Supervision of Other Students.” A site supervisor must be available to consult and supervise the peer-supervision group. Though the site supervisor does not need to physically be in the room with the peer supervision group, ALL decision regarding cases must be supervised by the site supervisor.

III. Practicum Class
Time spent while in practicum class will most often be divided into many different categories. It is your job to determine how each class time was spent. For example, time presenting a case would go under “Group Supervision.” Time spent discussing how hours should be recorded, receiving training on how to construct a treatment plan, or discussing class readings, etc. should be recorded under “Didactic Training.”
IV. Supervision of Other Students
When a doctoral-level student provides supervision to a masters-level student, or a masters-level student provides supervision to a bachelors-level student. Supervision provided to less advanced students should be counted in “Other Psychological Experience with Students and/or Organizations,” NOT under supervision. This activity is separate, but often confused with “Peer Supervision.” “Peer Supervision” is when several individuals who are at the same level of training, such as a group of masters students, get together to provide supervision of cases. (See definition of “Peer Supervision” above).

INTEGRATED REPORTS
Integrated Report includes a history, an interview, and at least two (2) of the following: objective and/or projective personality assessments, intellectual, cognitive, and/or neuropsychological assessment. These are synthesized into a comprehensive report providing an overall picture of the patient. As long as there are at least two assessment tools being integrated, it is an integrated report. The tools may or may not be in the same “category”.

***SPECIFIC TO SPACI CLINIC PRACTICUM***

1. When you have peer supervision – when you and your second-year mentor meet to discuss the case – that is logged as “Peer Supervision.”

2. During sessions with actual clients, if you are only observing the activity being delivered by the second-year mentor, this is logged as “Observation” under Support Activities. This is for observing trained individuals perform therapeutic activities.

3. During sessions with actual clients, if you are actually administering a test or part of a test, you record the exact amount of time as “Psychodiagnostic Test Administration” under “Psychological Assessment Experience.”

4. During sessions with actual clients, if you are providing testing or behavior support, you record this as “Other” under “Psychological Assessment Experience.”

5. If you are meeting with the second-year student engaged in the scoring of the assessments, this is listed under “Support Activities” as “Psychological Assessment Scoring/Interpretation.”

6. If you are meeting with the second-year student engaged in chart review or the writing of notes, you list this under “Support Activities” as “Clinical Writing/Progress Notes.” The support activity of “Chart Review” can also be used if you are reviewing the chart, reviewing the client’s record, reviewing the client’s school cum folder, etc.
7. If you are observing the child and taking behavioral notes, data, etc., then you can count it as “Assessment–Other.” This is a direct hour. This is what is used when conducting an observation as part of testing or as an assessment method.

8. If you are only observing the trainee conducting the measure without collecting observation data on the child, then it is a supportive/indirect activity – “Observation” – for observing other trained individuals perform therapeutic activities.
The following guidelines are specific to PsyKey, since most candidates currently use this system. However, other programs such as MyPsychTrack and Time2Track are also available.

Some recommendations:

1. **State logging your hours from the very beginning.** You are going to need detailed information about your practicum experiences and direct/indirect hours breakdown for many reasons, so having everything organized will help you access it effectively and without so much hassle.

2. If you are not sure about how to log an activity, ask your professors and compare notes/thoughts with your peers.

3. Logging hours accurately from the beginning will help you input correct hours-totals when applying for internship.

4. You can schedule certain tasks you know will happen every week (e.g., supervision) ahead of time. You need to select “yes” in the “repeating” option when adding a new task and then confirm it.

5. Always add the clients and their demographic information (as much as you know) when you log in activities. Use de-identified codes and keep a separate, password-protected list of the clients they correspond to if you need to. The internship application process asks for totals related to that demographic information. It will be stress-free to get a summary on it with only a couple of clicks.
6. To create groups (related to group therapy activities and multiple assessments during SREP), first add each individual client and then create the respective group.

![Selected Clients](image)

7. Add parents and teachers as individual clients so that you can assign them to consultation (direct) hours. This will help you accumulate some adult hours.

![Task Details](image)

8. Creating a “clerkship” for each semester will help you create quick reports that include all the tasks and locations you may have logged in throughout the semester. This will be handy when practicum professors ask for summaries of your hours.

9. Integrated reports refer to any reports that include **2 or more** assessment measures.

10. Back up your data regularly. You can download an Excel file from PsyKey with the information you choose from filters you select.

11. When you add all relevant information with each task/client, you can access different summaries through PsyKey. You can filter information by dates, clerkship, or location.

![Custom Reports](image)

This tab will summarize data in a way that fits format from the AAPI application system.

**What is considered **direct** while shadowing?**
When you are face-to-face with the client(s) who is(are) receiving services by the school psychologist. Some examples include parent intake, testing, consultation with teachers.

Since it is a process to learn how to facilitate/administer services, students must be actively observing (e.g., taking notes) to facilitate this process.

**How to log these hours?**
In the category that corresponds to the delivered service.

DEPARTMENT OF CLINICAL AND SCHOOL PSYCHOLOGY

Evaluation of Profession-Wide Competencies

Field-Based Training Experiences Evaluation Form

Directions to the Supervisor: Please evaluate the candidate based upon his/her current level of training. Thus, any student functioning adequately in this practicum/internship should be rated primarily 4s and 5s. If the student has not yet had the opportunity to engage in a specific activity or to demonstrate a specific skill and there is no basis for evaluation, rate the item NA.

Each practicum evaluation must be based in part on direct observation of the practicum student and his/her developing skills (either live or by video recording). Such observation must occur at least once per semester but need not encompass all nine competency areas at any given time.

Key to Ratings:

NA No Opportunity to Demonstrate
1 (20%) Remediation Required: Fails to demonstrate knowledge/skill as required at this training level
2 (40%) Remediation Required: Beginning to demonstrate this knowledge/skill as required at this training level
3 (60%) Remediation Required: Some basic knowledge/skill attained but not demonstrated routinely as required at this training level
4 (80%) Competent: Uses knowledge/skill consistently as part of repertoire required at this training level
5 (100%) Proficient: Demonstrates more advanced knowledge/skill than is typical for this training level

NOTE: Candidates must earn an average rating of "4" or 80% for each competency measured. Candidates who earn total scores of less than 80% in a specific competency area must engage in a remediation process.

This evaluation form is based upon the following sources of information (check all that apply):
___Direct observation (required; either live or video recording)
___Audio recording
___Discussion in supervision
___Feedback from others
___Candidate’s participation in meetings
___Review of clinical records/assessment data/psychological report(s)
___Other (please specify) __________________________________________________________
### Competency I – RESEARCH
The Standards of Accreditation (SoA) of the American Psychological Association (APA) recognizes science as the foundation of health service psychology. This area of competence requires substantive knowledge of scientific methods, procedures, and practices.

<table>
<thead>
<tr>

| Applies knowledge of family systems and family influences on child development to relate effectively with parents and other stakeholders | NA 1 2 3 4 5 |
| Works to support parents to facilitate collaboration between schools, parents, and community agencies in addressing student needs | NA 1 2 3 4 5 |
| Identifies and addresses cultural and contextual factors relevant to consultation processes and/or outcomes | NA 1 2 3 4 5 |
Supervisor Comments:

Candidate Comments:

I, the practicum/internship supervisor, reviewed this evaluation with the aforementioned candidate.

Supervisor Signature: __________________________________________ Date: ______________________

Candidate Signature: ______________________________________ Date: ______________________
Nova Southeastern University – Doctoral Program in School Psychology
PRACTICUM SITE/SUPERVISOR EVALUATION FORM

Name of District/Placement: ____________________________________________________________

Name of Field-Based Supervisor: ______________________________________________________

Name of Practicum Instructor: __________________________________________________________

Name of practicum course and course number: _____________________________________________

Semester and year: ____________________________________________________________________

This form must be completed by the practicum student at the end of each semester.

I. Indicate if your supervisor:
   a) introduced you to staff members □Yes □No
   b) acquainted you with the policies and procedures of the district/agency □Yes □No
   c) provided you with a minimum of 45 minutes of face-to-face supervision weekly □Yes □No
   d) provided constructive feedback during supervision □Yes □No
   e) provided positive feedback □Yes □No
   f) identified potential legal and ethical issues □Yes □No

II. Please rate your practicum supervisor in each of the areas listed below using the following rating scale:

   1=Unsatisfactory  2=Below Average  3=Satisfactory  4=Above Average  5=Excellent

   a) _____ Supervisor's ability to relate effectively to students (attitude; flexibility and openness, interest and enthusiasm and capacity to facilitate student exploration of relevant personal issues).
   b) _____ Clarity of objectives for supervision.
   c) _____ Clarity of expectations and evaluation criteria.
   d) _____ Overall rating of your supervisor

III. Using the scale provided below, please place the appropriate number next to each statement:

   1=Strongly disagree  2=Disagree  3=Somewhat agree  4=Agree  5=Strongly agree
   N/A=Not applicable

   a) _____ I received the amount of supervision specified in my practicum contract.
   b) _____ My supervision time was rarely canceled, delayed, or shortened.
   c) _____ When my supervision time was canceled, delayed, or shortened, the supervision time was subsequently made up.
   d) _____ My written work was carefully reviewed and sufficient feedback was given.
   e) _____ My supervisor was open to a range of approaches to treating my cases.
f) ___ A sufficient amount of supervision time was spent reviewing taped therapy materials.
g) ___ My supervisor remained abreast of my caseload and my clients' progress.

IV. List the practicum’s supervisor’s most noticeable strengths and areas for improvement:
   a) Strengths:

   b) Areas for improvement:

V. Please rate your practicum site:
   a) as a learning experience  □ Poor □ Fair □ Good □ Very Good □ Excellent
   b) the experience in general: □ Poor □ Fair □ Good □ Very Good □ Excellent

VI. Please provide a list of strengths of the practicum setting?

VII. Please provide a list of challenges with the practicum setting. How can these challenges be rectified?

VIII. Would you recommend this site for future practicum students? □ Yes □ No
      If no, please describe why.

IX. Did you feel adequately prepared for this practicum? □ Yes □ No
     If no, what additional training would have been useful?
X. Please rate how well you believe the **practicum experience** prepared you in the areas listed below. If you were placed at more than one setting, please be sure to complete a separate form for each site.

Please use the following scale for your ratings:

INTERNSHIP SUPERVISOR EXIT EVALUATION
To be completed at the conclusion of the internship year.

Name of Intern: ______________________________________________________________

Internship Program: __________________________________________________________

Internship Director: __________________________________________________________

Supervisor(s): ________________________________________________________________

Please evaluate the performance of our doctoral candidate at the end of your internship program. Please also provide any comments regarding relative strengths as well as areas for improvement under each assessment of competency. Each evaluation must be based in part on direct observation of the candidate and his/her developing skills (either live or electronically).

1. Based on your experience with this Intern, how does his/her training compare with interns from other graduate programs?

   1  2  3  4  5
   Much Less Somewhat Less Similar to Somewhat Better Much Better
   Well Trained Well Trained Others Trained Better
   Trained Trained

   Strengths:

   Weaknesses:
2. Based on your experience with this Intern, what suggestions do you have to improve our graduate training program?

3. Other comments about this Intern’s performance:

4. On the basis of this review, are you willing to indicate at a later time to the National Register, state licensing boards, or other accrediting agencies that the Intern satisfactorily completed his/her internship under your supervision?

   _____ YES    _____ NO

5. Final Grade for the Year:

   _____ PASS    _____ FAIL

6. Please check the appropriate line below to confirm that the aforementioned Intern has completed a minimum of 2000 hours:

   _____ YES    _____ NO

7. FINAL COMPLETION DATE OF INTERNSHIP: ____________________________

   ____________________________  ____________________________

PSYCHOLOGY SERVICES CENTER
AUTHORIZATION FOR AUDIO/VISUAL RECORDING AND OBSERVATION FOR SUPERVISORY PURPOSES

As a consenting adult, I authorize Nova Southeastern University, Inc. on behalf of its College of Psychology (hereinafter referred to as “NSU-COP”) and Psychology Services Center (hereinafter referred to as “PSC”) and such clinical faculty, licensed psychologists and students as may be assigned to my (or my child’s) treatment to use or disclose the audio/video taping of my (or my child’s) therapy sessions for supervisory and/or training purposes.

I understand that the audio/video tape may be viewed in individual and/or small peer group supervision sessions at NSU-COP and/or PSC by clinical faculty and/or licensed psychologists and students as an educational opportunity to help train students.

I also understand that clinical faculty, licensed psychologists and students may observe the therapy sessions by way of closed circuit TV or one-way mirrors, and that I will be notified by me clinical faculty and/or licensed psychologist and/or student in each instance.

I understand that only my (or my child’s) first name will be used or my (or my child’s) name will not be mentioned during a session.

I understand that the contents of the audio/video tape will remain confidential within the supervision group of students at NSU-COP and/or PSC. I understand that the audio/video tape will be stored in a secure location at NSU-COP and/or PSC.

This authorization shall be in force and effect until the completion of the supervisory and/or training review of this session at which time this authorization to use or disclose this protected health information expires.

I understand that, as set forth in NSU’s Notice of Privacy Practices, I have the right to revoke this Authorization, in writing, at any time by sending written notification to:

Dr. Ana Martinez
Nova Southeastern University
College of Psychology
3301 College Avenue
Fort Lauderdale, FL 33314

I understand that if I revoke this authorization, it does not apply to any action NSU, PSC or others have taken in reliance on my authorization before they received my written notice. I understand that information used or disclosed according to this authorization may be subject to re-disclosure and may no longer be protected by federal or state law.

I understand that PSC will not condition my (or my child’s) treatment on whether I provide authorization for the requested use or disclosure. I understand I have the right to refuse to initial this authorization.

FOR EDUCATIONAL AND RELATED PURPOSES
(OTHER THAN FOR TREATMENT AND PAYMENT PURPOSES)

Patient Name (last, first, middle initial): __________________________________________ Date of Birth: __________
Patient Address: __________________________________________ City: __________________ State: _______ Zip: __________
Telephone No: ( ) ______________________________

SPECIFY THE INFORMATION TO BE DISCLOSED: When I sign this Authorization, I authorized Nova Southeastern University, Inc., on behalf of its College of Psychology and the Psychology Services Center (hereinafter referred to as “NSU-COP”) to use or disclose the following health information during the term of this Authorization:

- Video tapes/recordings
- Audio tapes/recordings
- Photographs
- X-rays and other diagnostic tests/films
- Medical Record Information (including but not limited to: description of injury or condition, clinical history, family history, patient demographics, test results, patient diagnosis and patient treatment)

I understand and agree that the information I am authorizing to be released may include:

1. HIV/AIDS Testing or Treatment (including the fact that an HIV test was ordered, performed or reported, regardless of whether the results of such tests were positive or negative)
2. Information about Substance (i.e., alcohol or drug) Abuse
3. Information about Abuse of an Adult
4. Information about Sexual Assault
5. Information about Child Abuse and Neglect
6. Information about a Mental Illness or Developmental Disability
7. Information about Communicable Diseases
8. Information about Venereal Disease(s)
9. Information about Genetic Testing

PURPOSE: When I sign this Authorization, I authorize NSU-COP to use and disclose the protected health information listed above for the following purpose:

- Uses/disclosures by NSU students or faculty for classroom activities within NSU for current and future teaching activities within NSU including disclosures by students to faculty for exam purposes;
- To create and present one or more presentation(s), seminars, conferences and meetings;
- To create and publish one or more article(s), textbooks, internet publications, or other publications; and
- Uses and disclosures by NSU students and faculty for psychology clinical competency exams.

RECIPIENT: The following are the people to whom the NSU-COP may disclose my protected health information:

- NSU students or faculty for classroom/exam activities within NSU;
- Attendees at a public conference(s), seminars, or other educational session(s);
- Publishers and readers of an article, textbook, internet publication or other publication(s); and
- NSU students or faculty for psychology clinical competency exam activities.
EFFECTIVE DATE OF AUTHORIZATION:

This authorization shall be in force and effect until the end of the educational purpose at which time this authorization to use or disclose this protected health information expires.

I understand that, as set in NSU’s Notice of Privacy Practice, I have the right to revoke this authorization, in writing, at any time by sending written notification to:

Dr. Ana Martinez  
Nova Southeastern University  
College of Psychology  
3301 College Avenue  
Fort Lauderdale-Davie, FL 33314

I understand that a revocation is not effective to the extent that NSU-COP has relied on the use or disclosure of the protected health information.

I understand that information used or disclosed pursuant to this authorization may be subject to re-disclosure by the recipient and may no longer be protected by federal or state law.

I understand that NSU-COP will not condition my treatment on whether I provide authorization for the requested use or disclosure.

I understand that I have the right to:

- Inspect or copy my protected health information to be used or disclosed as permitted under federal law (or state law to the extent the state law provides greater access rights).
- Refuse to sign this authorization.
